## CANARY PRO DRY 8,6 MM

242 pink

499 neon green

我们的高端超轻绳索，同时符合三类绳索的认证。直径只有8.6mm，每米重量51g。Canary是这一级别绳索中最细最轻的单绳。高绳皮占有率使其称为市面上非常耐用的轻量化绳索。

- 采用Pro Dry工艺使其得到耐用的防水和耐脏性能
- 认证通过单绳，半绳和对绳标准
- 根据UIAA Water Repellent防水测试，吸水率低于2%
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕

Our ultra-light, high-end rope with triple certification. With its 8.6 mm diameter and weighing in at just 51 g per metre, the CANARY is one of the thinnest and lightest single ropes in its class. The thicker sheath proportion makes it the most robust lightweight rope on the market.

- Durably water repellent and dirt resistant thanks to the Pro Dry finish
- Certified as a single, half, and twin rope
- Water absorption less than 2% acc. to the UIAA Water Repellent Test
- 3D lap coiling enables instant use without tangles

## MADE IN GERMANY

## SWIFT 48 PRO DRY 8,9 MM

242 pink

329 icemint

一绳三用，SWIFT是一款单绳、半绳、对绳合一的绳索，直径只有8.9mm，属于直径非常低的单绳，采用48线轴数编织，使得SWIFT 48 Pro Dry有着平整的绳皮结构，带来出色的手感和高耐磨性。

- 超轻量化，低直径，出色的手感
- 采用Pro Dry工艺使其得到耐用的防水和耐脏性能
- 认证通过单绳，半绳和对绳标准
- 根据UIAA Water Repellent防水测试，吸水率低于2%
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕

One rope, three standards. The SWIFT is a single, double, and twin rope in one—plus with a diameter of 8.9 mm one of the thinnest single ropes on the market. Thanks to being made on a braiding machine with 48 bobbins, the SWIFT 48 Pro Dry has a particularly fine sheath structure that offers very pleasant handling while also being extremely abrasion resistant.

- Minimal weight, small diameter, and perfect handling
- Durably water repellent and dirt resistant thanks to the Pro Dry finish
- Certified as a single, half, and twin rope
- Water absorption less than 2% acc. to the UIAA Water Repellent Test
- 3D lap coiling enables instant use without tangles

## MADE IN GERMANY

71289

## SWIFT PROTECT PRO DRY 8,9 MM

022 night-green

729 night-fire

第一款将芳纶纤维编织到绳皮中的单绳，显著提高抗切割能力。并且采用了特殊工艺，SWIFT PROTECT PRO DRY依然保持很好的弹性。尽管采用了芳纶和更高的绳皮占比，其冲击力依然达到标准的要求。这些特点使得SWIFT PROTECT PRO DRY依然是一款优秀的先锋攀登动力绳和阿式攀登和登山的好伴侣。

- Thermo Shield热处理带来出色的手感
- 采用Pro Dry工艺使其得到耐用的防水和耐脏性能
- 根据UIAA Water Repellent防水测试，吸水率低于2%
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕
- 更高的绳皮占有率和混纺芳纶工艺，带来更高的抗切割能力，例如在锋利边缘
- 认证通过单绳，半绳和对绳标准

*The first dynamic single rope with a sheath that includes aramid, for markedly increased cut resistance. Thanks to a special processing method, the SWIFT PROTECT PRO DRY remains dynamic. Despite reinforcement with aramid and the overall higher sheath content, the impact force remains within the required standard. These characteristics make the SWIFT PROTECT PRO DRY the ideal lead climbing rope and the perfect companion for alpine climbing and mountaineering.*

- Thermo Shield treatment for perfect handling
- Durably water repellent and dirt resistant thanks to the Pro Dry finish
- Water absorption less than 2% acc. to the UIAA Water Repellent Test
- 3D lap coiling enables instant use without tangles
- Higher sheath content and aramid processing for increased cut resistance under load, e.g. over sharp edges
- Certified as a single, half, and twin rope

## SWIFT ECO DRY 8,9 MM

900 assorted colours

全球第一款采用无PFC的绳索，并且达到UIAA Water Repellent防水标准。

- Thermo Shield热处理带来出色的手感
- 认证通过单绳，半绳和对绳标准
- 根据UIAA Water Repellent防水测试，吸水率低于2%
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕
- 采用无PFC的Eco DRY防水工艺使其得到耐用的防水和耐脏性能

*The world's first ever PFC-free rope that meets the UIAA Water Repellent standard.*

- Thermo Shield treatment for perfect handling
- Certified as a single, half, and twin rope
- Water absorption less than 2% acc. to the UIAA Water Repellent Test
- 3D lap coiling enables instant use without tangles
- Durably water repellent and dirt resistant thanks to the PFC-free Eco Dry finish

## HUMMINGBIRD ECO DRY 9,2 MM

057 icemint-citrus

058 night-citrus

我们对轻量化绳索的补充，非常耐用的运动攀岩动力绳。低直径，低重量，平整的绳皮结构。HUMMINGBIRD ECO DRY 9.2 MM能带来出色的手感。使用无PFC的Eco Dry工艺。这些使得HUMMINGBIRD成为环保的运动攀岩绳索。

- 采用无PFC的Eco DRY防水工艺使其得到永久的防水和耐脏性能
- 根据UIAA Water Repellent防水测试（要求吸水重量小于自身5%），吸水率低于2%
- Thermo Shield热处理带来出色的手感
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕

The perfect complement to our lightweight ropes and durable sport climbing ropes. With its small diameter, minimal weight, and fine sheath structure, the HUMMINGBIRD ECO DRY 9.2 MM offers excellent handling characteristics. We use the PFC-free Eco Dry technology for its coating. All this makes the HUMMINGBIRD an environmentally friendly, high-end sports climbing rope.

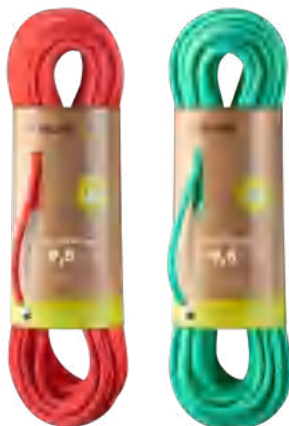

- Permanently water repellent and dirt resistant thanks to the PFC-free Eco Dry finish
- Meets the stringent requirements of the UIAA Water Repellent Test (water absorption less than 5% of its own weight)
- Thermo Shield treatment for pleasant handling
- 3D lap coiling enables instant use without tangles

## MADE IN GERMANY

71341

## EAGLE LITE ECO DRY 9,5 MM

643 neon coral

971 bright green

经过市场考验的经典动力绳，如今采用了无PFC的Eco Dry工艺的EAGLE LITE ECO DRY 9.5 MM，耐用、轻量化、手感出众。这些都通过48线轴数的编织机，使其拥有平整的绳皮结构和耐磨的性能。

- 采用无PFC的Eco DRY防水工艺使其得到永久的防水和耐脏性能
- 根据UIAA Water Repellent防水测试（要求吸水重量小于自身5%），吸水率低于2%
- Thermo Shield热处理带来出色的手感
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕

Our proven classic, now with a PFC-free Eco Dry coating! The EAGLE LITE ECO DRY 9.5 MM is robust, light, compact and pleasant to the touch. This symbiosis is achieved by braiding on a machine with 48 bobbins, which gives the rope a particularly fine sheath structure with high abrasion resistance.

- Permanently water repellent and dirt resistant thanks to the PFC-free Eco Dry finish
- Meets the stringent requirements of the UIAA Water Repellent Test (water absorption less than 5% of its own weight)
- Thermo Shield treatment for pleasant handling
- 3D lap coiling enables instant use without tangles

71343

## EAGLE LITE PROTECT PRO DRY 9,5 MM

225 neon pink-neon green

EAGLE LITE动力绳经过了市场验证，我们根据它开发了适合运动攀和目标路线的更耐用的型号，我们使用了Protect工艺，绳皮中结合了高强度芳纶纤维，采用了特殊的编织工艺。这一技术提高了绳皮的强度和抗切割性能。得到了紧凑和平整的绳皮结构。EAGLE LITE PROTECT PRO DRY使用48线轴数编织，手感和耐磨性出众。使得EAGLE LITE PROTECT PRO DRY成为可靠的多段结组和大岩壁攀登单绳，也可完美配合拖曳绳使用。

Based on the proven construction of the EAGLE LITE, we have developed a rope that is particularly robust and is still suitable for sport climbing and projecting routes. To this end, we use Protect technology, which incorporates high-strength aramid fibers into the sheath using a specially developed braiding process. This technology and the adjustment of other production parameters strengthen the sheath and increase the rope's cut resistance. For a particularly compact and fine sheath structure, the EAGLE LITE PROTECT PRO DRY is processed on a braiding machine with 48 bobbins, which has a positive impact on handling and abrasion resistance. These features make the EAGLE LITE PROTECT PRO DRY a reliable companion on demanding multi-pitch routes and big-wall adventures when climbing with single rope and additional tag line, where necessary.

- 更高的绳皮占有率和混纺芳纶工艺，带来更高的抗切割能力，例如在锋利边缘
- 采用Pro Dry工艺使其得到永久的防水和耐脏性能
- 根据UIAA Water Repellent防水测试（要求吸水重量小于自身5%），吸水率低于2%
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕
- Thermo Shield热处理带来出色的手感

- Higher sheath content and use of aramid fibers for increased cut resistance under load, e.g., over sharp edges
- Permanently water repellent and dirt resistant thanks to the Pro Dry finish
- Meets the stringent requirements of the UIAA Water Repellent Test (water absorption less than 5% of its own weight)
- 3D lap coiling enables instant use without tangles
- Thermo Shield treatment for pleasant handling

71334

## TOMMY CALDWELL ECO DRY DT 9,6 MM

499 neon green

这款绳索与职业攀岩者Tommy Caldwell共同开发，有高绳皮占用率，适合磕线和大岩壁攀爬。现在采用了无PFCA的Eco Dry防水处理，使其成为UIAA标准的防水绳索。

This rope was developed in cooperation with the professional climber Tommy Caldwell. Its high sheath proportion makes it ideal for working routes or big wall climbing. Now also with a PFC-free Eco Dry finish in line with the UIAA standard for water-repellent ropes.

- Thermo Shield treatment for perfect handling
- DuoTec for permanent middle marking
- Water absorption less than 2% acc. to the UIAA Water Repellent Test
- 3D lap coiling enables instant use without tangles
- Long-lasting water-repellent and dirt-resistant, thanks to the PFC-free Eco Dry finish

71335

# HERON ECO DRY 9,8 MM

214 fire

329 icemint

HERON是一款经过市场验证的经典绳索，适合各种使用环境。耐用的多用途绳索配有无PFC的Eco Dry防水工艺，达到了UIAA防水标准。

- 轻量化，高强度，并且手感出众
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕
- Thermo Shield热处理带来出色的手感
- 根据UIAA Water Repellent防水测试，吸水率低于2%
- 采用无PFC的Eco Dry防水工艺使其得到持久的防水和耐脏性能

The HERON is a proven classic with a broad range of uses. The robust all-round rope now comes with a PFC-free Eco Dry finish in line with the UIAA standard for water-repellent ropes.

- Light weight, high strength, and superb handling
- 3D lap coiling enables instant use without tangles
- Thermo Shield treatment for perfect handling
- Water absorption less than 2% acc. to the UIAA Water Repellent Test
- Long-lasting water-repellent and dirt-resistant, thanks to the PFC-free Eco Dry finish

71292

# SKIMMER ECO DRY 7,1 MM

017 night

329 icemint

市场上最细，最轻量化的半绳，是攀冰和混合攀登的首选，适合对每一克重量都在意的使用环境。配有无PFC的Eco Dry防水工艺，达到了UIAA防水标准。

- 极致轻量化，低直径，手感出众
- Thermo Shield热处理带来出色的手感
- 根据UIAA Water Repellent防水测试，吸水率低于2%
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕
- 采用无PFC的Eco Dry防水工艺使其得到持久的防水和耐脏性能
- 认证通过半绳和对绳标准

The thinnest and lightest half rope on the market. The first choice for demanding ice and mixed climbing, or whenever every gram counts. Now also with PFC-free Eco Dry finish as stipulated by the UIAA standard for water-repellent ropes.

- Minimal weight, small diameter, and perfect handling
- Thermo Shield treatment for perfect handling
- Water absorption less than 2% acc. to the UIAA Water Repellent Test
- 3D lap coiling enables instant use without tangles
- Durably water repellent and dirt resistant thanks to the PFC-free Eco Dry finish
- Certified as a half and twin rope

71236

# APUS PRO DRY 7,9 MM

138 oasis

329 icemint

APUS结合了强度，安全和出众的手感，并且保持了更低的直径，非常适合阿式攀登。

- 极致轻量化，低直径，手感出众
- Thermo Shield热处理带来出色的手感
- 采用Pro Dry工艺使其得到永久的防水和耐脏性能
- 根据UIAA Water Repellent防水测试，吸水率低于2%
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕

The new APUS combines outstanding strength, safety, and handling with a slight diameter. The go-to rope for alpine adventures.

- Minimal weight, small diameter, and perfect handling
- Thermo Shield treatment for perfect handling
- Durably water repellent and dirt resistant thanks to the Pro Dry finish
- Water absorption less than 2% acc. to the UIAA Water Repellent Test
- 3D lap coiling enables instant use without tangles

## STARLING PROTECT PRO DRY 8,2 MM

109 yellow-night

377 icemint-night

绳索会经常遇到锋利边缘，特别是在登山环境下。我们的STARLING也采用了Protect技术，提高了抗切割性能。在生产Protect系列的绳索时，将绳皮中混编了芳纶纤维，但是并不影响动力绳的性能。

- Thermo Shield热处理带来出色的手感
- 采用Pro Dry工艺使其得到耐用的防水和耐脏性能
- 根据UIAA Water Repellent防水测试，吸水率低于2%
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕
- 更高的绳皮占有率和混纺芳纶工艺，带来更高的抗切割能力，例如在锋利边缘

*Ropes are often exposed to sharp edges—especially when used in alpine terrain. As a result, our well-established STARLING half rope now uses our Protect technology to offer far greater cut resistance. When manufacturing our Protect ropes, the sheath is strengthened using a special processing method involving aramid fibers without impairing the ropes' dynamic properties.*

- Thermo Shield treatment for perfect handling
- Durably water repellent and dirt resistant thanks to the Pro Dry finish
- Water absorption less than 2% acc. to the UIAA Water Repellent Test
- 3D lap coiling enables instant use without tangles
- Higher sheath content and aramid processing for increased cut resistance under load, e.g. over sharp edges

## 71291 KINGLET 9,2 MM

017 night

047 snow

手感极佳的运动攀绳索，9.2mm的直径使其非常轻量化，并且平衡了不同的性能。

- Thermo Shield热处理带来出色的手感
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕
- 低直径轻量化绳索

Our go-to sport climbing rope with extremely pleasant handling. The 9.2 mm diameter means low weight and the materials used result in balanced climbing characteristics.

- Thermo Shield treatment for perfect handling
- 3D lap coiling enables instant use without tangles
- Light weight due to small rope diameter

## MADE IN GERMANY

71500

## PARROT 9,8 MM

900 assorted colours

耐用的，多用途环保绳索。采用其他产品中剩下的高质量纱线制造。手感和性能与其他绳索产品相同。

- Thermo Shield热处理带来出色的手感
- 创新的设计
- 非常高的性价比
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕
- 纹理和颜色会根据所使用剩下的纱线而不同

*Robust, all-round rope with an ecological footprint. Produced of high-quality yarns left over from our production. Its handling and strength are identical to our other ropes.*

- Thermo Shield treatment for perfect handling
- Innovative design
- Outstanding price-performance ratio
- 3D lap coiling enables instant use without tangles
- The pattern and color can vary due to the use of leftover rope

## INTERSTATIC PROTECT

耐切割静力绳。绳索在编织时将高强度的芳纶纤维编织到绳皮中。这使得INTERSTATIC PROTECT拥有了两倍于相同直径和绳皮占用率的静力绳的耐切割性。这些性能以及低延展性使得INTERSTATIC PROTECT适合暴露在有锋利边缘和需要高安全系数的环境下使用。

Static rope with integrated cut resistance. This means high-strength aramid fibers are integrated into the rope sheath during the braiding process. As a result, the INTERSTATIC PROTECT has almost double the cut resistance compared to a static rope with a comparable sheath proportion and diameter. These characteristics, together with its low elongation values, make the INTERSTATIC PROTECT the first choice for all applications when the rope is exposed to sharp edges or whenever an additional safety margin is desirable.

- Thermo Shield热处理工艺能带来出色的手感
- 绳皮上的纹理线条能够确定绳索直径
- 绳皮中增加了芳纶纤维提高了抗切割性
- 注意：即使使用此绳索，也依然需要足够的边缘保护
- 经过与ActSafe ACC电动上升器兼容测试（使用暗黑色11mm）

- Thermo Shield treatment for perfect handling
- Tracer threads on the sheath to indicate rope diameter
- Increased cut resistance through aramid processing in the rope sheath
- Important: even when using this rope, adequate edge protection is still required
- Tested for use with ActSafe model ACC (applies to diameter 11.0 mm in color night)

## STATIC LOW STRETCH

最好的工作定位的绳索。最小的延展性使得爬升不费力，使得它非常适合高空作业。低剩余延展性也非常适合在施加拉力（救援）时的精确工作定位。

The number one choice for precise work on and with ropes. The minimum elongation enables the effortless climbing of the rope making it an ideal companion when working at heights. The low residual elongation furthermore enables precise work when rigging (rescue) loads and during work positioning.

- 采用Multiple-wound全数编织工艺的聚酯纤维绳皮让延展率小于2%，带来了精确的工作定位
- 符合EN 1891 A类静力绳安全认证
- Thermo Shield绳皮热处理带来出色的手感
- 绳皮上的纹理线条能够确定绳索直径
- 高耐磨性和抗切割能力

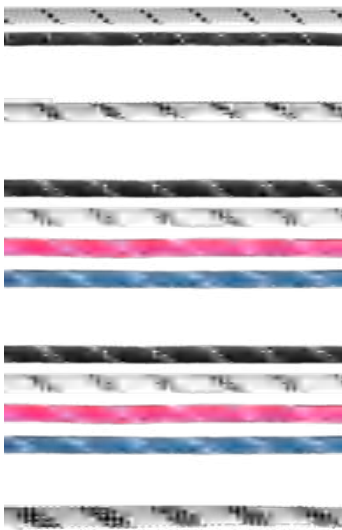

- Multiple-wound polyester sheath results in elongation values of less than 2% for greater precision when working
- Conforms to safety certification for static ropes (EN 1891 Type A)
- Thermo Shield treatment for perfect handling
- Tracer threads on the sheath to indicate rope diameter
- High abrasion and cut resistance

## PROSTATIC SYNCTEC

PROSTATIC SYNCTEC是一款静力绳，采用了永久的物理连接的绳芯一体夹芯绳。不仅能提高安全性也能提高绳索的寿命。采用了高强度的聚酯绳皮和聚酰胺绳芯保证了更小的延展性和最高的耐用性能。这些使得PROSTATIC SYNCTEC绳索成为高要求和高安全性的的作业和救援行动的首选绳索。

The PROSTATIC SYNCTEC is a static rope with a permanent, mechanically interconnected kernmantle that not only increases safety, but also extends the service life of the rope. The combination of a robust polyester sheath with a polyamide core ensures minimum elongation values and maximum abrasion resistance in use. These characteristics make the PROSTATIC SYNCTEC the first choice for demanding altitude and rescue operations, where an additional safety margin is beneficial.

- Thermo Shield热处理带来出色的手感
- 绳皮上的纹理线条能够确定绳索直径
- SyncTec绳芯一体技术通过永久的物理编织结构带来最高的结构稳定性和安全性
- 采用Multiple-wound全数缠绕绳皮带来低于3%的延展率

- Thermo Shield treatment for perfect handling
- Tracer threads on the sheath to indicate rope diameter
- SyncTec technology for maximum dimensional stability and additional safety through permanent mechanical kernmantle braiding
- Multiple-wound polyester sheath results in elongation values of less than 3% for greater precision when working

## 83225 POWERSTATIC

Powerstatic系列的绳索能带来良好的手感和出色的打结性能。能在下降器、保护器及救援设备中顺畅滑动，使得其成为一款多用途的绳索。

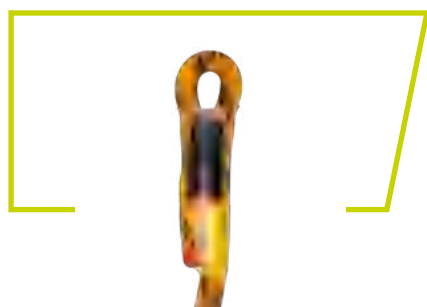

*The ropes in our Powerstatic series deliver particularly good handling and excellent knotability. They run very easily through descenders, belay, and rescue devices, which makes them all-rounders for a variety of applications.*

- 编织绳芯能带来持久的耐用性和边缘稳定性
- 螺旋并收缩处理的绳皮结构带来极高的耐用性和低收缩性
- 绳皮上的纹理线条能够确定绳索直径
- Thermo Shield热处理带来出色的手感

- Braided core for maximum durability and high edge stability
- Twined and shrunk sheath construction for maximum abrasion resistance and minimal shrinkage
- Tracer threads on the sheath to indicate rope diameter
- Thermo Shield treatment for perfect handling

## 71348 PINTAIL LITE 9,0 MM

采用螺旋编织的聚酯绳皮溯溪绳，带来出色的耐磨性。即使在高频率的使用和干湿交替使用后依然保持良好的手感。荧光黄色能保证在任何情况下的高可视性。低直径的PINTAIL LITE特别适合轻量化和灵活的溯溪者。

*Very robust canyoning rope with twisted polyester sheath for maximum abrasion resistance. This rope retains its suppleness even with intensive use and many wet-dry cycles. Its neon-yellow color scheme ensures good visibility at all times. With a small diameter, the PINTAIL LITE is geared especially toward anyone who likes to travel light and flexibly.*

- 明亮的颜色带来更好的可视度
- 9.0mm直径符合EN 1891 B类标准
- 螺旋编织聚酯绳皮带来出色的耐磨性

- Bright colors ensure good visibility
- The 9.0 mm version complies with EN 1891 Type B
- Twisted polyester sheath for maximum abrasion resistance

货号 N°.	直径 DIAMETER	最小断裂强度 MINIMUM BREAKING STRENGTH	每米重量 CERTIFICATION	长度 LENGTH	颜色 COLOR
71348	9,0 mm	25 kN	EN 1891 Typ B	40, 60, 100, 200 m	439 柠檬黄 439 lemon

71349

## PINTAIL 10,0 MM

聚酯绳皮的PINTAIL保证了高耐磨性和手感，即使在频繁使用和下降后依然柔软。较大的直径和抓握感适合溯溪团队游客使用。

The polyester sheath and construction of the PINTAIL ensure high abrasion resistance without any handling restrictions, as the rope remains supple even after intensive use and frequent abseiling maneuvers. Due to the slightly larger diameter and the easy-to-grip sheath structure, it is particularly well suited to introduce guided tour visitors to the world of canyoning.

- 聚酯绳皮带来高耐磨性
- 良好的可视度
- 符合静力绳EN 1891 A类安全标准

- Polyester sheath for high abrasion resistance
- Good visibility
- Fulfills the safety requirements for static ropes in accordance with EN 1891 type A

货号 N°.	直径 DIAMETER	最小断裂强度 MINIMUM BREAKING STRENGTH	每米重量 CERTIFICATION	长度 LENGTH	颜色 COLOR

71499

## RAP LINE PROTECT PRO DRY

138 oasis

329 icemint

RAP LINE是第一款有动力特性的辅绳，我们再次优化了它，将它的强度提高到10kN，同时降低它的重量至30g/m。RAP LINE可以适配目前所有的上升器。

- 可以承受EN892标准的2次对绳坠落测试
- 低延展性适合提拉装备和下降
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕
- 结合高强度聚酰胺和芳纶材料的特殊辅绳
- 提高了抗切割能力，如在锋利边缘
- 耐用的防水和耐脏性能

The RAP LINE is the first accessory cord with a dynamic safety reserve. We have revised it again and were able to increase the maximum tensile strength to more than 10 kN, while simultaneously reducing the weight to less than 30 g/m. The RAP LINE can be used with all current rope clamps.

- Withstands two required standard falls for dynamic twin rope tests according to EN 892
- Suitable for hauling equipment or abseiling, thanks to the low elongation values
- 3D lap coiling enables instant use without tangles
- Special accessory cord made of a combination of high-strength polyamide and aramid
- Increased cut resistance under load, e.g. over sharp edges
- Durably water repellent and dirt resistant

## MADE IN GERMANY

76053

## GUIDE ASSIST PRO DRY 8 MM

329 icemint

有动力特性的辅绳，用于在冰川上的暴露环境和横切时保护跟攀。注意：不能单根用于保护先锋攀。

- 采用Pro Dry工艺使其得到耐用的防水和耐脏性能
- 根据UIAA Water Repellent防水测试（要求吸水重量小于自身5%），吸水率低于2%
- 有短长度的可选
- Thermo Shield热处理带来出色的手感
- 3D Lap Coil包装让绳索能买来即用，不会发生缠绕

Accessory cord with dynamic safety reserve for support and belaying a second climber in exposed areas and traversing glaciers. Caution: not suitable for use as a single rope or for belaying a lead climber.

- Permanently water repellent and dirt resistant thanks to the Pro Dry finish
- Meets the stringent requirements of the UIAA Water Repellent Test (water absorption less than 5% of its own weight)
- Available in short lengths
- Thermo Shield treatment for pleasant handling
- 3D lap coiling enables instant use without tangles

MADE IN GERMANY

货号 N°.	直径 DIAMETER	最小断裂强度 MINIMUM BREAKING STRENGTH	每米重量 WEIGHT PER METER	长度 LENGTH	颜色 COLOR
76053	8,0 mm	14 kN	43 g/m	20 m, 30 m, 40 m	329薄荷蓝329icemint

76033

## HARD LINE

采用HDPE（高密度聚乙烯）和聚酯制造的辅绳。绳皮采用聚酯，保护绳芯被磨损，提高抓握力，方便打结。HDPE绳芯重量轻，高抗切割能力。使得Hard Line适合连接锚点（如制造保护站），或作为抓结。

Accessory cord made from a HDPE/ polyester mix. The sheath is made from polyester, which protects the core from premature abrasion, increases grip, and makes it easy to knot. At the same time the HDPE core means low weight and high cut resistance. This makes the Hard Line suitable, for example, as a connection to several fixed anchor points (belay station installation), threads, or prussic slings.

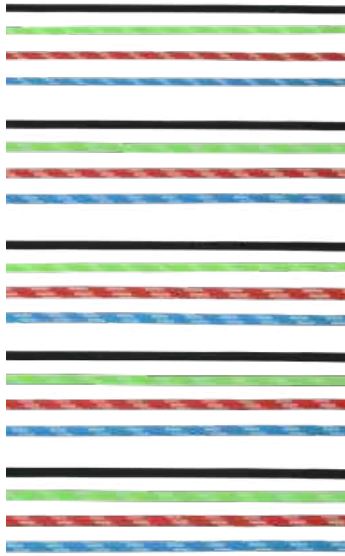

MADE IN GERMANY

71496 / 71497 / 71498/76051 / 76052

## PES CORD

现在有短长度的可选：采用聚酯制造，PES CORD 结合高耐磨性，低延展和优异的打结性能。

Now also available in short lengths: made from polyester, the PES CORD combines high abrasion resistance, low elongation, and excellent knotability.

- 特殊的绳皮结构使得打结性更好
- 纹理线条可以判断绳的直径

- Improved knotability due to special sheath construction
- The number of horizontal stripes indicates the diameter of the accessory cord

我们所有的动力绳和静力绳的技术参数都经过独立UIAA认证测试机构的测量。 All technical data for our dynamic and static ropes have been determined by an independent, UIAA-approved test institute.

## 技术TECHNOLOGY

我们对绳索进行复杂的工艺处理，使得绳索防水，耐脏。提高它们的使用寿命，让岩友们能够尽情体会和测试EDELRIID绳索的手感和柔软。

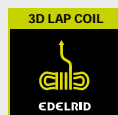

*We apply complex finishing treatments to make our ropes durably water- and dirt-resistant. This prolongs their service life and gives them their tried and tested EDELRIID handling and flexibility.*

### Cut Protect抗切割技术

全新开发的编织工艺将高强度的芳纶纤维和聚酯纤维混编，让绳索获得更高的抗切割能力，并且依然符合动力绳标准。虽然目前的动力绳标准并不要求测试抗切割能力，但是EDELRIID开发了自己的测试用于量化这一性能。

*The development of a new braiding process and the combination of high-strength aramid and polyester fibers enable us to produce ropes with a higher cut resistance that still comply with the standard for dynamic mountaineering ropes. As the current standard for these ropes does not stipulate the need for a test procedure to assess the cut resistance, here at EDELRIID we have developed our own test for reliably quantifying this property.*

### 3D Lap Coil包装

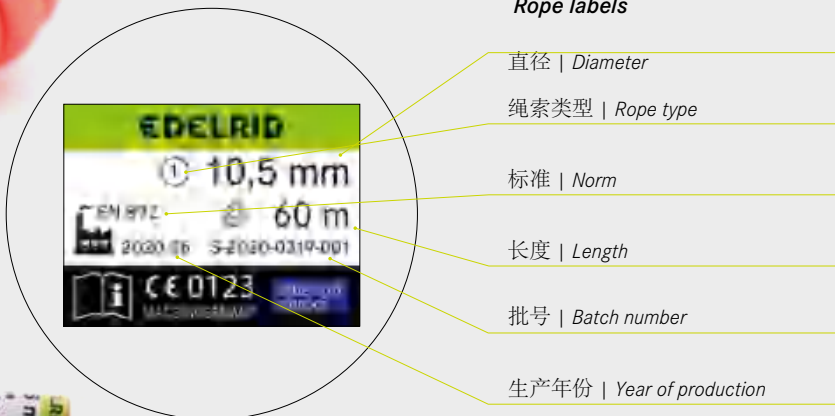

当你买回来新的绳索时，你可能会直接拿去攀岩。但是在抽绳时会发生各种缠绕和扭曲，很快让你心情陷入谷底。3D Lap Coil包装技术消除了你在第一次使用绳索拆包时的麻烦。我们开发了一种专门的绕绳机器来打包我们的绳索。使用这种复杂打包技术的绳索在开始攀爬前你只需要轻松从包装中拉出绳索即可。绳索上的标识和包装上的说明能快速让你了解如何拆包，免去绳索缠绕和扭曲的烦恼。

*When you get your hands on a new rope, you will want to start climbing straight away. But kinks and twists when uncoiling the rope can quickly put a dampener on your initial excitement. The 3D Lap Coil technique eliminates the need to uncoil ropes prior to their first use. To this end, we have equipped our production site with a specially developed lap coiling machine that carefully coils up our ropes. In combination with the sophisticated packaging design, starting climbing with your new rope right away could not be any easier as it can simply be pulled out of the packaging ready for use. The marking on the rope and detailed description on the packaging provide added assistance when removing the rope so it can be instantly used without any annoying twists or tangles.*

### 绳头标签

#### Rope labels

直径 | Diameter

绳索类型 | Rope type

生产年份 | Year of production

### Link Tec绳芯一体工艺

这个工艺将绳皮和绳芯在编织时进行了结合以降低绳皮滑动，提高了绳索的使用寿命。我们将这种工艺用于岩馆用绳，使其可以承受高频率长时间的顶绳使用。

*This procedure bonds together the core and sheath during the braiding process to minimize sheath slippage and significantly increase the rope's service life. We have always used this technology for our climbing gym ropes, which have to withstand the intensive, prolonged loads of top-roping.*

### Thermo Shield热处理

Thermo Shield热处理是一项基本的工艺，我们对所有绳索都进行这项工艺，它能让EDELRID的绳索更柔软和更好的手感。热稳定处理能让绳芯和绳皮纱线更均匀。特殊的热处理能绳索纤维先放松然后收缩。让纱线更顺滑，保证其长时间使用也能紧凑和柔软。同时也能保证绳索在日后不会收缩或变硬。

*Thermo Shield is the basic treatment that we apply to all our ropes to ensure they have the renowned EDELRID suppleness. The treatment involves a thermal process that perfectly aligns the core and sheath yarns. A special heat treatment relaxes then shrinks the rope's fibers. This harmonizes the gliding characteristics of the yarns inside the rope, making it supple and compact. The result is the creation of ropes that will neither shrink retrospectively nor quickly become stiff.*

### 缝合终端

我们久经考验的标准绳索终端，用于各种需要高强度的使用环境。绳头对折后进行缝合形成一个终端环。透明的保护套能够保护缝线不被损坏，并且透明的保护套可以轻松检查缝线。缝合终端的强度取决于绳索的结构和直径，你可以在每个绳索型号下找到相关数据。

*Our proven standard termination is always used when highest breaking strength are required. The rope end is reversed and sewn to create a termination eye. A transparent protective sleeve reliably protects the seam from damage. Thanks to the transparent protective sleeve, the seam can be visually inspected easily. The strength of the sewn termination depends on the construction and the rope diameter. You will find the relevant values with the individual rope data.*

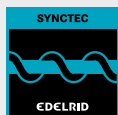

### 编制工艺

和两条纱线交叉编织的标准的绳皮结构不同（平双编制），Sports Braid编织工艺是将单独的一根纱线进行交叉编织。这种绳皮结构非常紧凑和平整。采用此工艺的绳索非常耐磨，能顺滑通过锁扣，并且手感非常柔软。这种工艺带来的优点远不及此，它还可以承受长时间的使用，例如频繁的顶绳和运动攀。

*Unlike standard braided constructions where two yarns are crossed by two other yarns (plain tandem braid), with the Sports Braid procedure, just one single yarn is crossed by another. The result is a particularly compact and fine sheath structure. These ropes are extremely abrasion resistant, glide easily through protection, and offer incomparably supple handling. The benefits of this technology are particularly evident in relation to ropes that have to withstand prolonged loads, e.g. when top-roping or during intensive sport climbs.*

### Sync Tec绳芯一体

和传统的夹芯绳相比，SyncTec绳芯一体工艺将绳芯和绳皮永久、物理地连接在了一起。在编织过程中，绳芯和绳皮每隔一段距离就被编织在一起。和其他化学方式的连接（如使用胶水）相比，它不会因为长时间使用而发生断连。所以SyncTec工艺稳定且持久。绳皮和绳芯组成一个整体，让拉力在纤维间分布地更均匀。同时这也让SyncTec工艺的绳索非常紧密，结构稳定，手感出众。此外，永久的绳皮和绳芯的连接能在绳皮损坏后防止发生绳皮滑动（例如在锋利边缘），这提高了绳索的安全性。这些使得SyncTec绳索成为高要求和高安全性的的作业和救援行动的首选绳索。

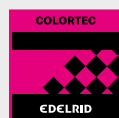

*In contrast to conventional kernmantle ropes, Sync Tec technology ropes have a permanent, mechanical connection between core and sheath. During the braiding process, the core and sheath are braided together at constant intervals. Compared to chemical connections (e.g. using adhesives), which can break down over time, the Sync Tec connection is permanently stable. Core and sheath form a unit, which leads to a better force distribution between the individual fibers. This makes Sync Tec ropes particularly compact, dimensionally stable and pleasant to handle. In addition, the permanent connection of core and sheath prevents the sheath from slipping off the core in the event of damage to the sheath (e.g. due to a sharp edge), which is an additional safety feature. These properties make Sync Tec ropes the first choice for demanding highaltitude and rescue operations, where an additional safety margin is desirable.*

### Duo Tec技术

EDELRID开发的专利编织工艺，可以制造出双色的绳索。绳索通过绳皮花纹从中间开始有明显的区分。这种中点标识能够在下降、理绳和估计剩余绳长时带来明显的优势。它是通过绳皮双色编织的方法达到的，在绳索的中点条纹从一边（如绿色）切换到另一边（如黑色）。这样就能使绳索有了永久的中点。

*A patented braiding process developed by EDELRID for the production of bicolor ropes. The two halves of the rope are clearly distinguishable due to a change in pattern halfway along the rope. The middle of the rope can always be clearly identified, which is a great advantage especially when abseiling, coiling a rope, or estimating how much rope you have left. This change in design is achieved by a bicolor strip woven into the sheath. On reaching the middle of the rope, the strip automatically switches from one side (e.g. green) to the other (e.g. black). This gives the rope a permanent center mark.*

### Color Tec技术

创新的编织技术用于制造双色绳索，能够在绳索的中间完全、永久改变花色，能清晰地判断绳索的中点。我们将这种编织技术用于我们的Pro系列绳索。设定绳皮纱线会自动改变，这样就能在绳索的另一半织出新的花纹以便进行区分。这种工艺是通过第二个编织圈完成的，内圈的线轴到外圈，外圈的线轴到内圈。这样就将向绳芯编织的纱线，向绳皮外编织，使之出现在表面，这种工艺能同时改变颜色和花纹。

*An innovative braiding process for making bicolor ropes with a braided design that changes completely, permanently, and unmistakably on reaching the middle of the rope. This provides a clear center marking. We exclusively use this braiding technique for the ropes in our Pro Line. The order in which the sheath yarns are deployed is automatically changed. This creates a new design for the second half of the rope that is easy to distinguish from that of the first half. The process is made possible by using a second braiding circle. The bobbins on the inner circle switch to the outer circle and vice versa. This means that sheath yarns that are initially woven into the core are now woven into the sheath and therefore appear on the rope's surface. The process can be used to change both the color and the design.*

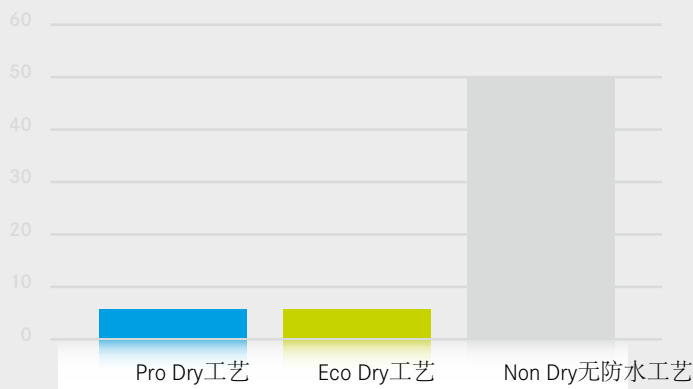

### Pro Dry工艺

没有经过处理的绳索会吸收50%自身重量的水分。当在潮湿环境下，绳索会变得更重，且手感变差，在寒冷环境时绳索甚至会冻住，这样就会降低绳索的安全性。经过浸泡处理的绳索可以用于在潮湿环境，例如攀登或登山。新开发的Pro Dry工艺能够解决这些烦恼，首先进行的是绳芯纱线浸泡处理。当编织完成后，绳索（绳皮和绳芯）被第二次浸泡，最后进行一次热处理。这样使得绳索能达到永久的防水和耐脏性能。Pro Dry的绳索能够快干，在潮湿环境下重量几乎不会增加，这样在低温下就不会结冰。其吸水性按照UIAA防水测试只有1-2%吸水率，这样就不会降低绳索在潮湿环境下的性能，保证足够的安全冗余。此外Pro Dry绳索能够提高纤维的滑动性，让绳索更耐磨，提高使用寿命。采用Pro Dry工艺的绳索可以制造低直径的绳索，并且不会影响其性能，不管是在冰冻的冰壁还是运动攀路线，我们的Pro Dry系列绳索都能带来耐用，柔软的手感和高安全冗余。

*Untreated ropes can absorb up to 50% of their own weight in water. When wet, such ropes become extremely heavy, hard to handle, and, in cold conditions, can even freeze. Furthermore, they lose many of their safety reserves. Impregnated ropes are therefore used for activities where ropes regularly get wet, such as ice climbing or mountaineering. Pro Dry is a newly developed finishing process that counteracts precisely these problems. The first step is to impregnate the core yarns. Once the braiding process is complete, the finished rope (core and sheath) is then impregnated a second time. In a final stage, the impregnation is thermally fixed. The result is a rope that is permanently water repellent and dirt resistant. Pro Dry ropes are particularly quick drying, have negligible weight gain when wet, and are resistant to freezing in low ambient temperatures. Due to their minimal water absorption of just 1-2% according to the UIAA water repellent test, they have minimal loss of performance and continue to offer high safety reserves even in wet conditions. In addition, the Pro Dry finish improves the gliding characteristics of the individual fibers, making the ropes more abrasion resistant and extending their service life. Only with the Pro Dry finish has it now become possible to manufacture ropes with an extremely small diameter without compromising on performance parameters. Whether on icy north faces or sport climbing routes, the ropes in our Pro Dry series offer impressive durability, pleasantly soft handling, and high safety reserves.*

### Eco Dry工艺

多氟化和全氟化化学品 (PFC) 可以让户外设备耐油, 污渍和水。但是一旦释放到环境中, 这些化学品的降解非常慢, 会造成长时间的环境问题。采用Eco Dry处理技术, 我们成功得到和高性能的PFC相同的工艺。夹芯绳结构让绳索的处理工艺非常复杂, 特别是处理过程不能影响绳索的安全性和功能性。Eco Dry工艺不仅能够达到所有的标准要求, 而且100% 无PFC。EDELRID SWIFT ECO DRY 8.9 mm是世界上第一款无PFC的绳索, 同时满足了UIAA防水标准。它只吸收自身重量1-2%的水分。此外达到bluesign®认证, 和Pro Dry系列的绳索有相同的耐用性, 耐磨性, 防水性和耐脏性能。

### UIAA防水测试

UIAA的防水测试对绳索的防水性能进行了量化。测试样品被先进行机械磨损, 就像实际中被岩石和冰块磨损。然后按照标准的方法在规定的时间内和水量下进行浸湿。吸水的重量不得超过绳索自身重量的5%。这样绳索就通过了“UIAA 防水”测试。

### UIAA Water Repellent Test

The UIAA Water Repellent Test makes the water-repellent properties of ropes measurable. The test samples are first subjected to a mechanical abrasion test, as occurs in practice in the use in rock and ice. Subsequently, the test sample is watered according to a standardized method in a defined time and with a defined amount of water. The proportion of absorbed water must not be more than 5 % of the self-weight of the rope. Ropes meeting these requirements may be designated as “UIAA Water Repellent”.

Polyfluorinated and perfluorinated chemicals (PFCs) make outdoor equipment resistant to oil, grease, and water. Once released into the environment, however, the chemicals only degrade very slowly, posing a long-term environmental problem. With the Eco Dry finishing technology, we have succeeded in developing a process that is almost as good as high-performance PFCs. Their three-dimensional kernmantel construction makes the treatment of ropes extremely complex, especially as the finishing process must never pose risks to a climbing rope's safety and functionality. The Eco Dry process meets all of these requirements and is 100% free from PFCs. The EDELRID SWIFT ECO DRY 8.9 mm is the world's first PFC-free rope to also meet the UIAA Water Repellent standard. It absorbs less than 1-2% of its own weight in water. In addition, it is bluesign® certified and offers comparable values to the Pro Dry line in terms of durability, abrasion, water repellency, and dirt resistance.

## 74915 PRISMA GUIDE

105 light grey

登山型号的PRISMA，特别适合登山和登山滑雪，超轻和小巧的尺寸依然带来出众的舒适度。配有护套的装备环，预制了外形并且体积小巧。额外的装备环和冰锥挂架能带来优良的装备管理。采用了内部Dyneema®材料和外部聚酯材料，创新的连接环重量更轻，更灵活。

- **Light Frame**结构: 降低重量, 带来良好的透气性, 两侧采用Dyneema®材料, 更好地分布重量
- 腰带上的Slide Block卡扣能完全打开, 方便安穿着冰爪和雪板时穿上安全带
- 腿环有两个调节档
- 4个对称配有护套的装备环, 2个额外的织物装备环, 4个冰锥挂架连接点

The alpine version of the PRISMA, specially for alpine excursions and ski mountaineering—ultra light and with a compact pack size yet amazingly comfortable. The thin gear loops are sheathed and stay in shape without being bulky. Additional gear loops and attachment options for ice screw clips offer plenty of opportunity to organize gear. Thanks to the combination of Dyneema® on the inside and polyamide on the outside, the innovative tie-in loop is far lighter and more flexible.

- **Light Frame Construction:** minimal weight and good air permeability thanks to the continuous edge bindings made from Dyneema®, which proportionately distribute the load
- Slide Block buckle on the waist belt can be fully opened to make the harness easier to put on when wearing skis or crampons
- Adjustable leg loops with two settings
- Four symmetrical, sheathed gear loops, 2 additional fabric gear loops, and 4 attachment options for ice screw clips

## 74914 PRISMA

329 icemint

超轻运动攀岩安全带，用于最难的磁线和阿式攀登。人体工程学腰带和腿环裁剪，降低重量的同时保持舒适度。采用了内部Dyneema®材料和外部聚酯材料，创新的连接环重量更轻，更灵活。

- 腰带上的20mm Slide Block 卡扣能完全打开, 方便安穿着冰爪和雪板时穿上安全带
- **Light Frame**结构: 降低重量, 带来良好的透气性, 两侧采用Dyneema®材料, 更好地分布重量
- 4个对称配有护套的装备环, 2个额外的织物装备环, 4个冰锥挂架连接点

Ultra-light, lined sport climbing harness predestined for the toughest of projects and alpine sport climbing. The anatomical cut of the waist belt and leg loops means that despite its low weight, the PRISMA is astonishingly comfortable. Thanks to the combination of Dyneema® on the inside and polyamide on the outside, the innovative tie-in loop is far lighter and more flexible.

- 20 mm Slide Block buckle on the waist belt can be fully opened for a comfortable and secure harness fit
- **Light Frame Construction:** minimal weight and good air permeability thanks to the continuous edge bindings made from Dyneema®, which proportionately distribute the load
- Four symmetrical gear loops and two attachment options for ice screw clips

# SENDERO

152 mineral blue

我们功能最全、舒适、轻量化的多用途安全带进行了全新的升级。新特点采用了中央对称结构，优化了安全带的调节，能让滑动的腰带衬垫在调节后依然位于中间。更大的装备环优化了结构，更方便挂取，而且采用了柔软的材料，在压缩时能降低体积，方便收纳。我们还在安全带上叠加内置了冰锥挂环的连接点。腿环上的采用新的调节卡扣，其位置能让拉动织带尾部更方便，并且降低了被磨损的概率。稍大的保护环采用了HMPE的夹芯结构，提高了耐磨性。SENDERO的外形非常流行个性，也同样在我们bluesign®认证安全带系列中。

*Our fully equipped, comfortable, lightweight all-round harness has received an extensive overhaul. The new features include a center fit construction that enables optimum harness adjustment thanks to sliding waist belt padding that can be centrally positioned. The larger gear loops with an optimized shape are easier than ever to handle and can be compressed to a compact size when storing the harness thanks to the soft material. We have also laminated the attachment points for ice screw carabiners and integrated them into the sit harness. The new positioning of the buckles on the leg loops makes both these and the strap ends easier to use and positions the buckles in an area that exposes them to less abrasion. The slightly larger central ring with an HMPE-kernmantle construction improves wear comfort. The SENDERO has a modern, stylish look and is part of our bluesign®-certified harness collection.*

- 3D 网眼衬垫和柔软的织带来舒适的感觉
- 采用bluesign®认证材料
- 腰带上的28mm Slide Block卡扣和腿环上15mm Slide Block卡扣能完全打开，方便穿着冰爪和雪板时穿上安全带
- 大的中间保护环采用HMPE夹芯结构
- 腰带和腿环桥上的水平连接环采用了HMPE耐磨保护层
- 外层的受力织带内置了磨损指示，并且提高了耐磨性
- 中央对称结构：滑动的腰带衬垫能始终位于中间，优化了安全带的调节
- 5个装备环，2个层叠冰锥挂架连接点，以及一个后部的粉袋连接环

- 3D mesh padding and soft padded edges for optimum comfort
- Made from bluesign®-certified materials
- 28 mm Slide Block buckle on the waist belt and 15 mm Slide Block buckles on the leg loops that can be fully opened to make the harness easier to put on when wearing skis or crampons
- Large central ring with an HMPE-kernmantle construction
- Parallel tie-in points on the hip and leg loop bridges with HMPE abrasion protection
- Exposed load bearing webbings with integrated red wear indicator that becomes visible with increased abrasion
- Center fit construction: sliding waist belt padding that can be centrally positioned enables optimum harness adjustment
- Five gear loops, two laminated attachment options for ice screw clips, and a chalk bag loop at the back

# 74930 SIRANA TC

专门为Tommy Caldwell的粉丝准备的安全带，SIRANA TC上有著名的大岩壁专业户Tommy Caldwell的签名。这款安全带和其他同系列安全带有着相同的特点。例如28mm的Slide Block卡扣。新的中央对称结构，优化了安全带的调节，能让滑动的腰带衬垫在调节后依然位于中间。装备环也进行了升级，全新的更大、更方便挂取的装备环，而且采用了柔软的材料，在压缩时能降低体积，方便收纳。稍大的保护环采用了HMPE的夹芯结构，提高了耐磨性。前卫的SIRANA安全带采用环保和节能的方法进行生产，符合严格的bluesign®系统要求。

The climbing harness for Tommy Caldwell fans. The SIRANA TC signed by the famous big wall climber Tommy Caldwell has the same features as our all-round alpine harness, the SIRANA with 28 mm Slide Block buckles. The new center fit construction offers sliding waist belt padding that can be centrally positioned and enables the harness to be optimally adjusted. The gear loops have also been modified. The new, enlarged form makes them easier to use and their soft material enables them to be compressed to a compact size when storing the harness. The new attachment points for ice screw carabin-ers are laminated and integrated into the waist belt. The slightly larger central ring with an HMPE-kernmantle construction improves wear comfort. The stylishly designed SIRANA is manufactured in an environmentally-friendly and resource-saving manner that complies with the strict requirements of the bluesign® system.

# MOE 3R

MOE 3R是第一款在市面上采用部分回收材料的运动攀登安全带。除了为了提高的强度和耐磨性的Dyneema®中间保护环，两个连接点和受力缝合线以外，弹性腿环带，Slide-Block卡扣和磨损指示的纱线都采用回收材料。为了提高回收材料的占比，一种特殊的聚酯短纤维作为填充代替了泡沫。蝶形的腰带提高了受力的分布和悬挂时的舒适性。

*The MOE 3R is the first part-recycled sport climbing harness on the market. With the exception of the Dyneema® central ring, the parallel tie-in points and the load bearing sewing yarn for extra strength and abrasion resistance as well as the elasticated leg loop straps, the Slide-Block buckle and the indicator yarn all components are recycled. To make the recycled material content as high as possible, a special polyester fleece is used as carrier material instead of foam. The butterfly shape of the waist belt optimally distributes loads and enhances hanging comfort.*

900 assorted colours

- 所有采用聚酯的织物材料都是回收的，包括衬垫
- 所有的织物材料都来自单一的聚酯，经过简单的重新合成处理并循环使用
- Slide-Block卡扣能舒适调节，完美匹配身体
- 4个对称的装备环和2个用于连接冰锥挂架的连接点
- 大的中间保护环采用夹芯结构
- 腰带和腿环桥上的水平连接环采用了Dyneema®耐磨保护层
- 外层的受力织带内置了磨损指示，并且提高了耐磨性
- 外层纤维采用bluesign®认证材料

- All textile materials made of polyester are recycled, including the padding
- Single-origin polyester in all textiles for simple reintegration into the recycling process
- Slide-Block buckle for a comfortable and secure fit
- Four symmetrical gear loops and two attachment options for ice screw clips
- Central loop with a kernmantle construction
- Parallel tie-in points on the hip and leg loop bridges with Dyneema® abrasion protection
- Exposed load bearing webbings with integrated red wear indicator that becomes visible with increased abrasion

## 74912 LOOPO LITE

105 light grey

在原有验证基础上改进细节的LOOPO LITE是一款超轻的滑雪旅行和高海拔登山安全带，有着极小的体积，并且荣获了多项大奖，但我们并没有满足于此。而是在多个方面对其进行了手感和耐用性的提高。新的外部压合材料更结实耐用。Light Frame采用了两根受力织带，更宽的受力分布带来更舒适的体验，并且保持了极低的重量。LOOPO LITE可以在穿着的情况下穿戴雪板和冰爪。新款采用了轻松操作的压扣将两个连接环固定，弹性织带能够轻松调节，腿环也同样可调。

Same proven concept, newly enhanced details! The LOOPO LITE, an ultra-light ski touring and high-altitude mountaineering harness with a small pack size, has already won many awards, but we have not been resting on our laurels. Instead, we have further improved various aspects, especially the handling and durability. The new, laminated outer material is particularly robust. The broader load distribution enhances comfort while the Light Frame construction with the two circumferential, load-bearing straps keeps the weight extremely low. The LOOPO LITE can still be put on without having to remove your skis/crampons. In fact, this is now easier than ever thanks to a push button that connects the two tie-in loops and an elasticated strap for adjusting the fit. The leg loop size can also be adjusted.

- 边缘受力结构采用超轻的Dyneema®材料
- 双连接环和卡扣系统能舒适调节和穿戴
- 可打开的腿环连接带可在穿着安全带的情况下穿戴雪板和冰爪
- 环上配有反光条，方便在黑暗情况下操作
- 4个织物装备环

- Load-bearing edge binding made of ultra-light Dyneema® material
- Double tie-in loop and buckle system for a comfortable fit and easy adjustment
- Detachable elastic straps on the leg loops allow the harness to be put on without having to remove skis or crampons
- Reflective tie-in loops—easier to recognise in the dark
- Four textile gear loops

## 74932 LOOPO AIR

bluesign  
PRODUCT

001 white

NEW

目前市面上最轻的攀登安全带，我们的开发团队用LOOPO AIR证明了什么是极致轻量化和超小的压缩体积。它通过了全部安全认证，采用了两个装备环，M号只有49g，轻如羽毛。可以折叠至一个拳头大小。LightFrame结构采用两条Dyneema®边框设计，提供了必须的强度和舒适性。混合的多层贴合采用聚酯和Dyneema®作为结构填充，提高了重量的分布，并且降低了重量。适用于滑雪和高山攀登，或者比赛，速度竞技，甚至能帮助你完成9c+。

The lightest climbing harness on the market by far. With the LOOPO AIR, our developers demonstrate what is possible in terms of weight reduction and ultra-small pack sizes. The fully certified harness with two gear loops is as light as a feather, weighing just 49 g in size M, and can be folded to the size of a fist. The LightFrame design made of Dyneema® with two circumferential edge straps provides the necessary secure fit. Hybrid laminate made of polyester and Dyneema® as a carrier material enables even force distribution and a low weight. Ideal for ski touring and high mountain tours or as a transmitter harness for competitions, speed, or 9c+.

- 受力结构采用超轻高强度的Dyneema®材料
- 二合一的连接点和插扣让安全带能轻松穿戴和调节
- 两个织物装备环

- Load-bearing construction made from ultralight, high-strength Dyneema®
- Halved tie-in point and click buckle make the harness easy to put on and adjust
- Two textile gear loops

045 pine green

035 sake gold

我们的全可调安全带，有四个尺码可选，专门为课程和租用场合使用。新的中央对称结构，优化了安全带的调节，能让滑动的腰带衬垫在调节后依然位于中间。腿环上配有左右腿的标签，方便穿戴时的正确。即使是大量的租用场合，不同尺码颜色的安全带也能快速辨认。RFID芯片能永久安装在腿环专门的小隔舱里，方便PPE的电子化租用管理。此外，腿环厚的弹性带即使经过高频率课程租用，也可以轻松更换配件，提高了安全带的使用寿命。

Our fully adjustable climbing harness specially designed for courses and rental use comes in four sizes. The center fit construction makes it possible to slide the waist belt padding so as to centrally position it and optimally adjust the harness. The left/right labels on the leg loops make it easier to put the harness on the right way round. Even with large rental operations, the color coding makes it easy to quickly identify the desired size. An RFID chip can be permanently stored in the specially designated leg loop pocket for digital rental and PPE management. Furthermore, the elasticated leg loop straps, which come under great strain due to regular use during courses and rental, can be easily replaced, extending the harness's overall service life.

- 中央对称结构：滑动的腰带衬垫能始终位于中间，优化了安全带的调节
- 颜色识别：每个尺码的安全带采用不同的颜色
- 两个对称的装备环
- 可更换的弹性腿环带
- 腿环上配有左右腿的标签，方便穿戴时的正确
- 轻松调节的Slide-Block卡扣能轻松穿上安全带，完美匹配身体
- 腰带和腿环连接桥的水平的连接点采用聚氨酯耐磨保护层
- 外层的受力织带内置了磨损指示，并且提高了耐磨性
- 腰带上的小隔舱能储存RFID芯片
- 安全带有清楚的标签位置方便标记
- 可选尺码S-XXL

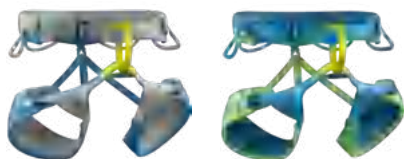

- Center fit construction: sliding waist belt padding that can be centrally positioned enables optimum harness adjustment
- Color coding: each of the four sizes comes in a different color
- Two asymmetrical gear loops
- Replaceable, elasticated leg loop straps
- Left/right labels on the leg loops make it easier to put the harness on the right way round
- Easy-to-adjust Slide Block buckle for easily putting on the harness and creating a secure fit
- Parallel tie-in points on the hip and leg loop bridges with Polyamid abrasion protection
- Exposed load bearing webbings with integrated red wear indicator that becomes visible with increased abrasion
- Small waist belt pocket for storing an RFID chip
- Clearly visible name field for labeling the harness
- Available in sizes S - XXL

创新的溯溪安全带，用于向导和个人使用者，配有可更换的保护套和磨损指示扁带。两个连接点（织物+金属）可以进行水平和竖直的连接，能够将下降和个人保护设备分开连接。两个额外的金属环可以连接绳包，四个大的装备环或连接小刀、锁扣等。腰带上的分离双织带系统提高了舒适性。

- 兼具水平和垂直连接点
- 4个卡扣设计，始终带来最好的调节和居中位置
- 2个尺码可用
- 腰带上的缝合卡扣能方便安全带的穿脱
- 腿环织带提高了耐磨性：受力的织带在保护扁带的内侧
- 可更换，非常耐用的帆布保护垫，采用无缝合结构
- 4个装备环，两个连接点，以及额外的装备管理和储存连接点
- 内置RFID芯片

*Innovative canyoning harness for guides and private users with replaceable abrasion protector and wear indicator webbing. The two tie-in points (textile + metal) allow horizontal and vertical attachment, to separate abseiling and self-belaying equipment as an example. Two further metal tie-in points for, e.g., the rope bag, four large gear loops (size 1: two gear loops) and attachment options for knives and gear carabiners round off the features. Increased comfort courtesy of the split two-band system on the waist harness.*

- *Stitched clip-in buckles at waist make it easy to put on and take off*
- *Available in two sizes*
- *Vertical plus horizontal integration point*
- *Four buckle design for maximum range of adjustment and a central attachment point at all times*
- *Leg loop straps protected against abrasion: load-bearing strap element enclosed in protective textile strap*
- *Replaceable, extremely robust abrasion protector without seams made of tarpaulin*
- *Four gear loops (size 1: two gear loops), two metal tie-in points, plus additional attachment options for gear storage and organization*
- *Integrated RFID transponder*

## 74920 IRUPU

138 oasis

138 oasis

用于团队租赁的溯溪安全带，配有可更换的保护垫和磨损指示扁带。采用了Dyneema®外层保护水平织物连接点。三个卡扣可以快速轻松地调节。两个大的装备环可以提供充足的空间。内置了RFID芯片，此外标签处可以进行个人标记。

- 腰带上的缝合卡扣能方便安全带的穿脱
- 居中结构：采用可移动的保护垫，可以居中连接点，进行更好的调节和安全带定位
- 腿环织带提高了耐磨性：受力的织带在保护扁带的内侧
- 可更换，非常耐用的帆布保护垫，采用无缝合结构

*Canyoning belt for rental operation with replaceable abrasion protector and wear indicator webbing. A Dyneema® sheath specifically protects the horizontal textile tie-in point. Three buckles make for quick and easy adjustment to different sizes. The two large gear loops provide ample space. An RFID transponder is integrated with the harness; in addition, a labeling field offers space for individual marking.*

- *Stitched clip-in buckles at waist make it easy to put on and take off*
- *Leg loop straps protected against abrasion: load-bearing strap element enclosed in protective textile strap*
- *Replaceable, extremely robust abrasion protector without seams made of tarpaulin*
- *Center Fit construction: centered tie-in point thanks to sliding hip pad for best possible adjustment and positioning of the harness*

## 74917 CLIMBING PACKAGE

900 assorted colours

从EDELRID攀岩套装开始吧。  
 此套装包括五件攀岩新手的基础装备：bluesign®认证的攀岩安全带MOE；小巧轻量化的HMS STRIKE SCREW主锁；创新的JUL 保护器；大粉袋CHALK BAG RODEO，以及两个粉球CHALK BALLS。全部装入自带的GRAB'n'GO包里，开始你的攀岩旅程吧。  
 MOE：流行舒适的运动攀岩安全带，配有一个腰带调节扣，两个可调节弹性腿环，舒适穿着。四哥装备环和两个冰锥挂架连接点，提供足够多的装备携带空间。MOE安全带是bluesign®认证产品，并且是我们的#climbgreen系列产品。  
 HMS STRIKE SCREW FG：非常小巧轻量化的HMS主锁。H结构，使用最少的材料达到最佳的强度。Keylock锁鼻使用手感更好，防止发生钩挂。  
 JUL2：创新的高制动力单绳保护器，优化了Mega Jul的结构，可以轻松使用粗的绳索进行保护（适合8.9-11 mm单绳）。  
 CHALK BAG RODEO LARGE：个性化的才有抓绒内里的粉袋，配有收集绳。采用bluesign®认证材料。有松绿色，钛灰色或藏红色。  
 CHALK BALLS：两个粉球内使用了高品质镁粉-降低了岩壁和室内的粉尘量。

Get started with the EDELRID climbing package.

This package includes five essentials to start your climbing adventure: the bluesign® certified unisex climbing harness MOE, compact & lightweight HMS STRIKE SCREW locking carabiner, innovative belay device JUL<sup>2</sup>, large CHALK BAG RODEO, and two CHALK BALLS. Packed in a gym bag—your GRAB'n'GO package to start your ultimate climbing adventure.

MOE: Modern and comfortable sport climbing harness with 3-buckle construction and adjustable leg loops for an optimal fit. The four gear loops and two ice screw clip attachments provide ample options for gear storage. The MOE is a bluesign® certified harness from our #climbgreen collection.

HMS STRIKE SCREW FG: Lightweight and versatile HMS carabiner. H-profile construction for best possible material utilisation with minimum weight. Keylock closure for optimal handling when attaching and detaching.

JUL<sup>2</sup>: Innovative belay device with high braking effect for single ropes. The optimised Mega Jul geometry ensures comfortable belaying even with thicker ropes (suitable for all single ropes from 8.9 to 10.0 mm diameter).

CHALK BAG RODEO LARGE: Stylish chalk bag with draw-cord closure and fleece lining. Made from bluesign® certified materials. Comes in pine green, titanium or saffron.

CHALK BALLS: Two chalk balls filled with finest magnesium carbonate for less dust emission in climbing and bouldering halls.

## 74319 JOKER

219 night-oasis

用于攀岩中心，高空课程和培训活动的全可调安全带。

An adjustable harness, ideal for courses and rental use.

- 左右两个腿环进行了标记方便穿戴安全带，固定的后部弹性带让使用更简单
- 使用传统的45mm宽织带
- Easy Glider卡扣能轻松调节，方便安全带穿脱
- 扁带尾部进行了缝合，防止扁带完全脱出
- 结实的装备环
- 配有小口袋用于安装RFID芯片

- Right/left leg loop markings and fixed, elasticated leg loop straps make it easier to put on the harness correctly
- Classic design made of 45 mm webbing
- Easy Glider buckles for infinite adjustment and to make the harness easy to put on and take off
- Stitched webbing terminations designed so that straps cannot be completely unthreaded
- Robust gear loop
- Small pouch on harness to accommodate an RFID tag

138 oasis

329 icemint

全可调儿童安全带，陪伴未来攀岩新星。采用循环利用材料和节能措施，符合严格的bluesign®认证。

- 2个结实的装备环，让装备更安全
- 可调节腿环采用三明治结构，并且保持了小巧的体积
- 连接点采用织物保护套
- 3D网眼衬垫和柔软的边缘更舒适
- 可移动的泡沫腰带衬垫能让四个装备环和连接点居中
- Slide Block卡扣能舒适安全地调节安全带
- 配有一个实用的小包

Fully-adjustable children's harness for the climbing stars of the future. Produced sustainably and in a resource-conserving manner in accordance with the strict bluesign® system.

- Two very strong gear loops offering more safety
- Adjustable leg loops with a sandwich structure for optimum fit
- Tie-in point with a textile abrasion protector
- 3D mesh padding and soft edging for optimal comfort
- Moveable foam waist padding allows the tie-in point and the four fixed gear loops to be centered and aligned
- Slide Block buckles for a comfortable and secure harness fit

# JOKER JUNIOR

118 oasis-icemint

可调节儿童安全带，用于攀岩馆，绳索课程和培训活动。

- 左右两个腿环进行了标记方便穿戴安全带，固定的后部弹性带让使用更简单
- 采用经典的45mm织带制造
- Easy Glider卡扣能轻松稳定的调节，让安全带穿脱更容易
- 连接点配有织物护套，有磨损指示，当过度磨损后能露出红色的丝线，方便早期识别
- 结实的装备环
- 配有小口袋用于安装RFID芯片

An adjustable kids' harness, ideal for courses and rental use.

- Right/left leg loop markings and fixed, elasticated leg loop straps make it easier to put on the harness correctly
- Classic design made of 45 mm webbing
- Easy Glider buckles for infinite adjustment and to make the harness easy to put on and take off
- Stitched webbing terminations designed so that straps cannot be completely unthreaded
- Robust gear loop

## 74908 FRAGGLE

329 icemint

采用衬垫的全身儿童安全带，可以让40kg以下的儿童享受攀爬的乐趣。硬的结构和固定腿环能让安全带的穿戴更简单。配有两个Slide Block卡扣，安全带能迅速调节至合身。两个大的连接环能有足够的空间扣入两把锁扣（如顶绳时）。Fraggle与众不同是当孩子长大，连接点也可以相应调整，这样安全带也能变大。此外，Fraggle安全带完全按照严格的bluesign®认证要求，这样更能保护环境，资源和我们的孩子。

- 3D网眼衬垫和柔软的织带边缘带来最佳的舒适度
- 两个Slide Block卡扣能快速轻松地调节安全带
- 背后的连接点能在陡坡或滑雪时带来额外的安全性
- 采用bluesign®认证材料制造
- “可成长”结构能优化穿着合身
- 衬垫能够保证安全带的稳定和穿脱的简易性，即使儿童自己也能轻松穿戴
- 配有实用的小包

*With this padded full body harness even young climbers and little mountaineers weighing up to 40 kg can enjoy a scramble. The stiff construction with the fixed leg loops makes putting the harness on much easier, and thanks to the two Slide Block buckles, the harness is quickly adjusted to the right size. The two large tie-in loops offer enough space for two carabiners clipped in opposite directions (e.g. for top-roping). What makes the FRAGGLE truly special is that as the child gets bigger, the tie-in point moves and the harness “grows” as well. Besides, the FRAGGLE is fully manufactured in compliance with the strict bluesign® system requirements, in order to protect the environment, and resources.*

- 3D mesh padding and soft webbing edges offer optimum comfort
- Two Slide Block buckles for quick and easy harness adjustment
- Attachment point at the back for extra safety in steep terrain or while skiing
- Made of bluesign®-certified materials
- “Growing” construction for an optimal and secure fit
- The padding ensures that the harness is dimensionally stable and can therefore be put on and taken off particularly easily—even by the child itself
- Tie-in points with Polyamid abrasion protection
- Delivered in a useful sports bag

## 74910 KERMIT

329 icemint

全可调儿童胸式安全带，适合配合FINN儿童安全带。

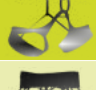

- 创新的八字结构
- 轻量化，全可调，使用一个20 mm Slide Block卡扣
- 透气的网眼衬垫
- 胸式安全带必须配合座式安全带使用
- 采用bluesign®认证材料制造

*Fully adjustable children’s chest harness. Ideal for use with the FINN climbing harness.*

- Innovative figure-of-eight construction
- Lightweight and fully adjustable thanks to a single 20 mm Slide Block buckle
- Breathable mesh for excellent ventilation
- Chest harnesses should only be used in combination with a sit harness
- Made of bluesign®-certified materials

1. 测量腰围  
Measurement of waist circumference
2. 测量大腿围  
Measurement of thigh circumference

最轻的重量，最高的安全性和舒适性，这始终是我们改进攀岩安全带的目标。

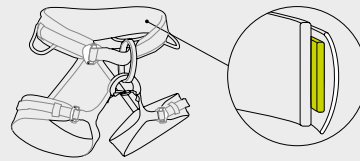

*Minimum weight, maximum safety and highest comfort - we continuously work on improving our climbing harnesses.*

### 3D Pad Technology

我们的安全带上使用的革新技术，在不增加重量和尺寸的情况下让安全带更舒适，尽量降低了衬垫的尺寸，让其位于最需要的位置上。它能提供非凡的支撑和舒适度，让重量精确分布。通过几根均匀分布的织带让重量平顺分布。采用了人体工程学裁剪的3D结构的腰带和腿环，避免了压力点，只使用了必要的衬垫让整体重量和体积降低。轻量化的三层泡沫能够在受力情况下依然保持稳定，并且优化了接触部位的透气、热量和汗液的散发。

*An evolution that makes our climbing harnesses even more comfortable without increasing their weight or pack size: with the 3D Pad technology, padding is minimized to strategically useful places, where it is intensively used. This provides outstanding support and comfort as well as optimum force distribution in the precise places where loads occur. The uniform and flat force distribution is supported by several homogeneously distributed straps. Thanks to the ergonomic cut with 3D-shaped waist belt and leg loops, pressure points and cutting in are prevented. The use of essential padding only helps to ensure a low overall weight and compact pack size. The light, 3-layer foam remains dimensionally stable even under load. The gaps are particularly breathable, enabling body heat and perspiration to be optimally released.*

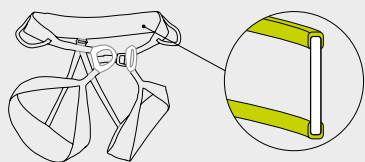

### Center Fit Construction

采用Center Fit结构的安全带在所有方面都很舒适。这种结构结合了高强度的受力扁带和3D网眼衬垫，让其非常舒适。可活动的泡沫衬垫可以调节，意味着连接点和装备环可以位于腰带中间。腰带上方反向边缘的设计能避免压力点，提高了悬挂时的舒适性。

*The harnesses in our Center Fit series are particularly comfortable all-rounders. Their construction combines strong, load-bearing webbing with 3D Mesh padding, making them significantly more comfortable. The moveable foam padding can be adjusted. This means that the tie-in point can be centered and the gear loops aligned for all waist sizes. Inverse edges at the top of the waist belt prevent pressure points and provide increased comfort when hanging.*

**49g** LOOPO AIR  
更轻，更紧实，更创新！

**Light Frame 结构**

边缘受力结构的安全带非常轻量化。边缘承重贯穿于整个安全带，能够安全承担臀部和腿部的重量。重量能够通过织带分布到衬垫。再配合网眼纤维，让其在轻量化的同时能够非常透气。我们主要在超轻的运动攀安全带和滑雪安全带上使用这种技术。

*Harnesses made with a load-bearing edge binding construction are particularly lightweight. The edge binding runs throughout the entire harness, so that it safely carries the load around both the hips and the legs. Weight is proportionately distributed from the webbing to the padding. Combined with perforated foam and mesh fabrics, it's possible to make extremely lightweight harnesses with exceptional breathability. We mainly use this technology for our ultra-light sport climbing and ski touring harnesses.*

## 74370 CABLE COMFORT TRI

219 night-oasis

这款高端飞拉达挽索再次提高了使用的操作感和畅快，因其采用了新的三向万向节，极大提高了活动的灵活性，降低了缠绕的可能。窄的弹性臂采用高强度、耐磨的HMPE材料，减低了总体重量。经过市场考验的One-Touch II锁扣有着优异的使用感。其大开门足以防止手指被锁门和钢缆夹到，短的悬挂距离也提高了操作性。

- 三向万向节防止缠绕，提高了活动的灵活性
- 轻巧细窄的弹性臂采用HMPE制造
- 休息环位于势能吸收器上
- 弹性臂能让锁扣易于接触
- 改进的OneTouch II锁扣能防止手指被锁门和钢缆夹到
- 新的势能吸收器符合EN958:2017标准：在各级别体重使用者的情况下冲击力都很低

*This high-end via ferrata set raises the bar for both handling and fun thanks to the triple-jointed swivel. This is because the additional flexibility eliminates tangling to offer maximum freedom of movement. The elasticated, narrow arms made of high-strength, wear-resistant HMPE keep the overall weight low. The tried and tested One-Touch II carabiners have a pleasant feel, are easy to use thanks to the large opening, and prevent the fingers from getting trapped between the cable and the gate. The short hanging length also simplifies handling.*

- Swivel with 3 joints prevents twisting and provides freedom of movement
- Thin, light, elasticated arms made of HMPE
- Rest loop situated on the shock absorber
- Elasticated webbing keeps the carabiners close to hand
- Optimized One Touch II carabiners prevent fingers getting trapped between the cable and the gate
- Shock absorber in compliance with EN 958:2017: low impact forces in all weight classes

**MADE IN GERMANY**

## 74340 CABLE COMFORT

138 oasis

高端飞拉达挽索，采用高强度弹性臂，使用简便。符合最新的欧洲飞拉达挽索标准。体积更小巧的势能吸收器方便操作。

- 休息环位于势能吸收器上
- 弹性臂能让锁扣易于接触
- 改进的OneTouch II锁扣能防止手指被锁门和钢缆夹到
- 内置万向节能在挂取时防止缠绕
- 新的势能吸收器符合EN958:2017标准：在各级别体重使用者的情况下冲击力都很低

*A high-end via ferrata set with elasticated high-strength arms and outstanding ease of use. It conforms to the new European safety standard for via ferrata sets. The new, far more compact shock absorber enables pleasant handling.*

- Rest loop situated directly at braking device
- Elasticated webbing keeps carabiners close to hand
- Optimized One Touch II carabiners prevent fingers getting pinched between the carabiner gate and steel cable
- Integrated swivel prevents ends from twisting when clipping/ unclipping
- Energy absorber conforms to EN 958: 2017: low impact force for all weight classes

**MADE IN GERMANY**

NEW

我们的超轻飞拉达套装又进行了升级，它目前依然是市面上最轻的产品。非常轻量化，细窄的弹性臂采用耐磨的HMPE材料，保证了长的使用范围。超轻的锁扣使用轻松，并且降低了总体重量。小巧的势能吸收器能让悬挂距离更短，方便操作。CABLE KIT ULTRALITE VII是一款小巧简约轻量化的飞拉达套装，是所有登山向导和超轻设备爱好者的理想装备。

- 目前市场上最轻的飞拉达套装
- 轻巧细窄的HMPE弹性臂
- 超轻锁扣，用最小的重量带来优异的手感
- 休息环位于势能吸收器上
- 弹性臂能让锁扣易于接触
- 新的势能吸收器符合EN958:2017标准：在各级别体重使用者的情况下冲击力都很低
- 即使在180°回扣错误使用时，依然能达到EN958:2017标准

*Our ultralight via ferrata set has received a number of updates to make it the lightest model on the market at present. The extremely light, thin, elasticated arms made of wear-resistant HMPE enable a long range. The ultralight carabiners are easy to use and contribute to the set's overall low weight. The compact shock absorber and short hanging length offer outstanding handling. The CABLE KIT ULTRALITE VII is a compact, simple, minimalist, and lightweight via ferrata set—the perfect solution for all mountain guides and fans of ultralight gear.*

- Currently the lightest via ferrata set on the market
- Thin, light, elasticated HMPE arms
- Ultralight carabiners for optimum handling with minimum weight
- Rest loop situated on the shock absorber
- Elasticated webbing keeps the carabiners close to hand
- Shock absorber in compliance with EN 958:2017: low impact forces in all weight classes
- Fulfills the current standard EN 958:2017 even with 180° misuse

## JOKER KIT

900 assorted colours

多用途的飞拉达套装，包括一个全能型安全带 JOKER，经过市场考验的飞拉达挽索CABLE KIT，其配有耐磨的弹性臂，更轻量化。以及一个耐用的混合型头盔ZODIAC。

- Easy Glider卡扣能轻松稳定的调节，让安全带穿脱更容易
- 左右两个腿环进行了标记方便穿戴安全带，固定的后部弹性带让使用更简单
- 耐用抗冲击的注模ABS外壳
- 改进的OneTouch II锁扣能防止手指被锁门和钢缆夹到
- 新的势能吸收器符合EN958:2017标准：在各级别体重使用者的情况下冲击力都很低

Versatile via ferrata kit containing the climbing harness JOKER, the tried-and-trusted via ferrata set CABLE KIT with wear-resistant, elasticated webbing arms, and the lightweight and extremely stable hybrid helmet ZODIAC.

- Easy Glider buckles for infinite adjustment and to make the harness easy to put on and take off
- Right/left leg loop markings and fixed, elasticated leg loop straps make it easier to put on the harness correctly
- Robust and impact-resistant injection-moulded ABS shell
- Optimized OneTouch II carabiners prevent fingers getting pinched between the carabiner gate and steel cable
- Energy absorber conforms to EN 958: 2017: low impact force for all weight classes

# VIA FERRATA BELAY KIT

900 assorted colours

用于飞拉达的陡峭或技术路段上保护儿童和没有攀爬经验的人。

- 可以自动制动保护器
- 保护绳索两段采用缝合终端
- 绳索终端采用不同颜色方便识别
- 不需要额外的锁扣
- 实用的携带包配有使用说明
- 两种长度可选
- 生产使用我们生产过程中剩余的材料制造，所以绳索颜色随机

*Designed for optimal belay safety to bring up children or inexperienced climbers on steep or technical sections of via ferratas.*

- *Belay plate with automatic self-braking*
- *Belay rope with sewn termination at both ends*
- *Rope end terminations have different colors for easier differentiation*
- *No additional carabiners required*
- *Practical transport bag with instructions for use*
- *Available in 2 different lengths*
- *Belay rope made from leftover ropes from our production process to save resources. This means the rope color may vary.*

**MADE IN GERMANY**

# RFID | RADIO FREQUENCY IDENTIFICATION

## 什么是RFID?

RFID是一种利用电磁波的自动无线数据传输收发系统。RFID系统包括一个位于物体上或物体内的应答器，其中包括一个识别码（如序列号），和一个可以读取码的扫描器。

EDELRID只使用UHF频率范围内的应答器。UHF应答器的一个特别优点是，它们由扫描仪来激活，不需要自己的电源。当使用UHF时可以使用价格低廉且独立的应答器。此外，该技术在金属设备上产生故障的情况显著降低。使用无源转发器，可以在不影响扫描速度的情况下扫描2-6米以外的产品。

在实际应用中，这意味着数字化读取节省了时间和金钱，由于可以永久对产品识别，PPE产品的寿命大大延长，并且显著减少了人为错误。

## 优势一览:

- 节约时间和成本
- 降低潜在的人为错误
- 增加设备的寿命

## WHAT IS RFID?

*RFID describes a technology for transmitter-receiver systems for automatic and contactless data transmission using electromagnetic waves. An RFID system consists of a transponder, which is located on or in the object and contains an identifying code (e.g. the serial number), and a scanner to read this code.*

*EDELRID only uses transponders in the UHF frequency range. A particular advantage of UHF transponders is that they are activated by the scanner and do not require their own power source. When using UHF, inexpensive and individual transponders can be used. In addition, this technology is significantly less susceptible to faults in metallic components. With passive transponders, products 2-6 meters away can be reached without negatively affecting the scanning speed.*

*In practical application, this means digital readability saves time and money, the lifespan of the PPE products is extended considerably due to the permanent product identification and the human error chain is significantly reduced.*

## All advantages at a glance:

- *Saves time and money*
- *Reduces potential human error*
- *Increases product lifespan*

**RFID是如何工作的?**

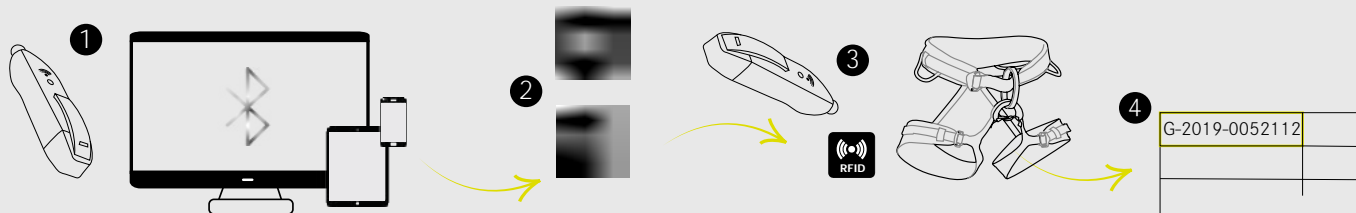

RFID READER读取器可以和任何有蓝牙的设备连接，并且使用独立的软件。

1. 和设备进行RFID READER读取器配对。
2. 根据自己的选择打开PPE管理软件（如Gear Pilot, Excel等）。
3. 选择需要扫码的设备类型。
4. 扫描你的PPE上的RFID应答器，序列号便能自动读取。

**HOW DOES RFID WORK?**

The RFID READER can be used with any device that has a Bluetooth® interface and is software independent.

1. Pair the RFID READER with the device.
2. Open the PPE management software of your choice.
3. Select the field into which you want to scan the serial number.
4. Scan the RFID transponder in your PPE product and the serial number is automatically read.

# SALATHE LITE

329 icemint

SALATHE LITE头盔比它的“长兄”还要轻20%! 我们通过Curv®代替了传统的ABS外壳来达到这一减重目的, 它是最新一代的高性能热塑性塑料。其特点与纤维加强材料类似, 例如碳纤维: 非常结实, 高拉伸强度, 完美的抗冲击性, 同时具有轻量化的特点。

The SALATHE LITE is almost another 20% lighter than its big brother! We have achieved this weight reduction by replacing the classic ABS shell with Curv®, the latest generation of an extremely high performance, thermo-plastic material. It has similar properties to fiber-reinforced composites like carbon: good rigidity, high tensile strength, and exceptional impact resistance—all with a very low weight.

- 在耳朵下方的全可调下颚带和开合系统更舒适
- 超轻EPP (发泡聚丙烯) 盔体带来优异的冲击力吸收能力和结构稳定性
- 可轻松调节的固定织带佩戴稳定, 并且体积小, 更透气
- 头灯固定采用前部的两个卡扣和后部的弹性织带
- 大的通风孔能保证持续的通风和热量散发
- 头盔外形也专门适配滑雪镜
- 人体工程学构造的内部衬垫可拆卸和清洗
- 两侧、前部、后部的撞击测试依照EN 12492标准
- 顶部和前部采用结实的硬质外壳采用全新超轻的Curv®材料, 提供了增强的保护, 如遇到落石

- Fully adjustable chin strap with closure system under the ear for greater comfort
- Ultra-light EPP core (expanded polypropylene) for outstanding shock absorption and high dimensional stability
- Easily adjustable harness straps for a secure fit, minimal pack size, and excellent ventilation
- Headlamp attachment with two clips at the front and an elastic strap at the back
- Large vents ensure a constant supply of fresh air and heat dissipation
- The helmet shape is specially designed for use with ski goggles
- Ergonomically-shaped interior with removable, washable padding
- Side/front/back impact tested according to EN 12492
- Robust hard shell made from innovative, ultra-light Curv® material in the upper and front areas for additional protection e.g. in the event of rockfall

# ZODIAC

047 snow

138 oasis

140 sahara

200 red

329 icemint

ZODIAC是一款轻量化，并且非常结实的混合型头盔。结合了EPS内盔体和ABS外壳，使得其非常结实，现代的低盔檐设计让外壳能很好的提供侧部撞击。大透气孔能带来持续的空气流通，让佩戴者头部保持凉爽。并且对很多细节进行了优化：Wing Fit系统能更优化和快速的调节，下颚带卡扣方便使用，内衬可拆卸和清洗。所有这些特点让ZODIAC成为理想的登山，攀岩和飞拉达头盔。

- 两侧、前部、后部的撞击测试依照EN 12492标准
- 后部的转轮式Wing-fit系统能调节适应所有头形
- 大的通风孔能带来持续的空气交换
- 头围可折叠进头盔大大降低了打包体积
- 全可调的下颚带和侧部卡扣舒适性更高
- 内置的头灯卡扣（前面2个，后面1个）
- 可拆卸，可清洗的内衬

The ZODIAC is a lightweight and extremely stable helmet with a hybrid structure. The combination of EPS inner shell and ABS outer shell makes it very robust, and the modern design with the deep-drawn shells provides very good protection against side impact. The very large ventilation openings allow continuous air exchange to keep the wearer's head cool. Even the minor details have been optimized: the Wing Fit system allows for optimal and quick adjustment, the new chin strap buckle is easy to use, and the padding is removable and washable. All these features make the ZODIAC an ideal companion for mountaineering, climbing, or for use on via ferratas.

- Side, front, and back impact tested according to EN 12492
- Wing-fit system with a dial on the back of the head for optimal adjustment to all head shapes
- Large ventilation openings ensure a continual exchange of air
- Cradle folds into the helmet to significantly reduce the pack size
- Fully adjustable chin strap with side buckles for greater comfort
- Integrated head torch clips (2x front, 1x back)
- Detachable, washable padding

72051

# ZODIAC 3R

017 night

另一款EDELIRID倡导的循环环保产品！ZODIAC 3R是第一款市面上循环利用的头盔：其外壳采用聚酰胺制造，其来自我们生产中循环利用的攀登绳索；内部的EPS盔体也是来自循环利用的材料。但是这并不会影响头盔的安全性，舒适度和透气性。ZODIAC 3R非常适合登山，攀岩和飞拉达。其混合结构能够提供全方位的保护和加强的侧部撞击保护；同时采用了现代流行的大通风孔设计，让佩戴者即使在很热环境下也能头部保持凉爽。并且对很多细节进行了优化：Wing Fit系统能更优化和快速的调节，下颚带卡扣方便使用，内衬可拆卸和清洗。

- 头盔内外结构均采用回收材料
- 两侧、前部、后部的撞击测试依照EN 12492标准
- 后部的转轮式Wing-fit系统能调节适应所有头形
- 大的通风孔能带来持续的空气交换
- 头围可折叠进头盔大大降低了打包体积
- 全可调的下颚带和侧部卡扣舒适性更高
- 内置的头灯卡扣（前面2个，后面1个）
- 可拆卸，可清洗的内衬

Another EDELIRID pioneer on the sustainability front! The ZODIAC 3R is the first part-recycled helmet on the market: the outer shell made of polyamide consists 100% of recycled climbing ropes from our production; the EPS inner shell is fully recycled too. However, there is no detrimental effect on safety, comfort, or ventilation. The ZODIAC 3R is ideal for mountaineering, climbing, and for use on via ferratas. Its hybrid structure provides good all-round protection with additional protection against side impact; simultaneously, the modern design features a very large ventilation area to help wearers retain a cool head even in heated situations. Even the minor details have been optimized: the Wing Fit system allows for optimal and quick adjustment, the new chin strap buckle is easy to use, and the padding is removable and washable.

- Inner and outer shells made from recycled material
- Side, front, and back impact tested according to EN 12492
- Wing-fit system with a dial on the back of the head for optimal adjustment to all head shapes
- Large ventilation openings ensure a continual exchange of air
- Cradle folds into the helmet to significantly reduce the pack size
- Fully adjustable chin strap with side buckles for greater comfort
- Integrated head torch clips (2x front, 1x back)
- Detachable, washable padding

200 red

儿童版本的ULTRALIGHT也同样进行了升级。它和成人版一样性能优异。

- 非常结实和抗冲击的聚丙烯外壳
- 一个尺码：适合头围48-58cm
- 可安装头灯
- 全可调、可更换、可清洗的顶带和下颚带，优化了佩戴性
- 多孔结构方便空气流通
- 舒适的衬垫和抗菌织带

*The Junior version of the ULTRALIGHT has also had a make-over. It provides the same outstanding protection as the ULTRALIGHT.*

- Extremely robust and impact-resistant polypropylene shell
- One size: fits a head circumference of 48 - 58 cm
- Headlamp attachment option
- Fully adjustable, replaceable, and washable head and chin strap for optimum fit
- Various vents for continuous air exchange
- Comfortably padded carrying system with antibacterial webbing

#### Curv®技术

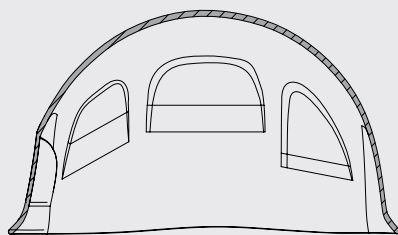

Curv®是一款出色的材料，它将100%热塑性塑料的多功能性和限位加强复合材料的高性能相结合。使用Curv®制造的部分具有高硬度，高抗拉伸强度和高抗冲击性。同时，它们非常轻盈，可以进行热塑。我们在新头盔重充分利用了这些突出的特点，来达到最小的重量和最好的保护。

*Curv® is an outstanding material that combines the versatility of a 100% thermoplastic with the high performance of a fiber-reinforced composite. Parts made with Curv® exhibit high stiffness, high tensile strength and outstanding impact resistance. At the same time, they are extremely light and can be molded thermoplastically. We take advantage of these out-standing properties in our new helmet shell, where minimum weight and maximum protection are required.*

**Wing Fit 系统**全新的采用调节轮的固定系统。通过转轮头围织带可以迅速调节至头的外形。运输时头围可以折叠入头盔。

*Innovative closure system with rear adjustment dial. The webbing cradle can be quickly adjusted to fit all head shapes by turning the dial. During transport the cradle tucks away into the helmet.*

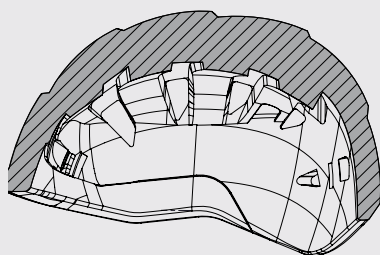

### 硬壳头盔

头盔有很结实，抗冲击的塑料外壳，其覆盖整个头盔的外层。过去这种外壳采用玻璃纤维加强塑料，如今则采用聚丙烯和丙烯腈-丁二烯-苯乙烯（ABS）混合材料。

内部的织带结构增加了缓冲效果，保证头盔外壳不会直接接触头部。织带的延展性和外壳的形变用于吸收冲击力。采用这种硬质结构和抗菌织带可以轻松进行拆除和清洗，使得这类头盔适合商业设施，如攀岩馆和冒险公园。

### Hardshell Helmet

These helmets have an extremely robust and shockproof shell made of plastic, which extends over the entire outer helmet surface. Whereas in the past the shells were mainly made of fiberglass reinforced plastic, nowadays mixtures of polypropylene and acrylonitrile butadiene styrene (ABS) are generally used. An internal strap construction increases the cushioning properties and ensures that the helmet does not rest directly on the head. The elongation of the straps and the elastic deformation of the shell ensures any impact energy is absorbed. Thanks to its extremely solid construction and the largely antibacterial straps, which can be easily removed and cleaned, this helmet form is particularly suitable for commercial facilities such as climbing gyms and adventure parks.

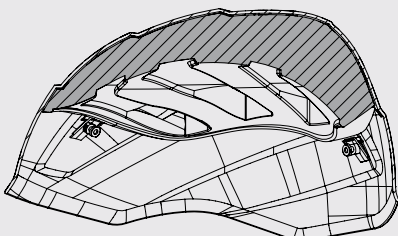

### 注模超轻头盔

采用注模技术的头盔外壳采用聚碳酸酯，并且紧贴在用于吸收冲击力的发泡聚苯乙烯（EPS）内核上。EPS内核通过形变来吸收冲击力。聚碳酸酯外壳保护者EPS内核免受损失，并且将冲击力分散到更大的区域。根据型号的不同，一些外壳只覆盖头部的部分区域。注模技术的头盔重量都很轻，但是没有其他类型的头盔耐用。注模头盔可能会不小心被压坏，例如不小心坐到储存头盔的包上。

### In-Mold Helmet

Helmets with in-mold technology have a thin outer shell made of polycarbonate, which is firmly connected to a shock-absorbing expanded polystyrene (EPS) core. The energy is absorbed by a deformation of the EPS core. The polycarbonate shell protects the EPS core from damage and distributes the resulting force over a larger area. Depending on the model, the outer shell may only partially cover areas of the head. In-mold helmets are particularly light, but also less robust than other helmet types. In-mold helmets can be damaged by careless stressing, for example, by accidentally sitting on them when they are stowed in the rucksack.

### 混合型头盔

混合型头盔结合了软壳和硬壳头盔的优点。外壳采用结实，抗冲击的ABS材料。在外壳下方有EPS（发泡聚苯乙烯）泡沫提供优异的冲击力吸收能力。混合头盔的耐用性适合各个环境。

### Hybrid Helmet

Hybrid helmets combine the advantages of both In-Mold and hardshell helmets. The outer shell is made of robust and impact-resistant material such as ABS. Underneath the outer shell, an internal EPP/EPS (expanded Polystyrene) foam shell provides excellent shock absorption. Hybrid helmets are particularly robust and light all-rounders.

## 73915 SWITCH DOUBLE ADJUST

499 neon green

SWITCH DOUBLE ADJUST是SWITCH系列中的多用途挽索。采用可以吸收冲击力的动力绳制造 (SWIFT 48 Pro Dry 8.9 mm)，长臂采用了绳索调节器，短臂可以连接下降器。大环通过套结连接安全带。

- 可在负重情况下进行调节
- 配有KIWI SCREW锁扣连接锚点
- 高强度的夹芯绳结构
- 长度在15至120cm之间可调，短臂长度45cm
- 注意：不能用于飞拉达

The SWITCH DOUBLE ADJUST is the multi-tool in the SWITCH family. The lanyard made from energy-absorbing dynamic rope (SWIFT 48 Pro Dry 8.9 mm) combines adjustability via an ascender with a second, shorter arm that can be used for a descender device, for example. The large loop enables simple attachment to the harness using a girth hitch.

- Length adjustable even under load
- Integrated KIWI SCREW carabiner for attachment to the anchor point
- Highly robust kernmantle construction
- Length adjustable from 15 to 120 cm, length of the short arm: 45 cm
- Please note: must not be used as a via ferrata set

MADE IN GERMANY

## 73907 SWITCH ADJUST

499 neon green

采用动力绳 (SWIFT 48 Pro Dry 8.9 mm) 制造的可吸收一定冲击力的可调节保护挽索。SWITCH ADJUST的长度可以通过调节器快速轻松调节，即使在负重情况下！大环通过套结连接安全带。

- 即使在负重情况下也可以调节长度
- 配有KIWI SCREW锁扣连接锚点
- 高强度的夹芯绳结构
- 长度在15至120cm之间可调

Adjustable self-belaying lanyard made from energy-absorbing dynamic rope (SWIFT 48 Pro Dry 8.9 mm). The length of the SWITCH ADJUST can be quickly and easily adjusted using a rope clamp - even if under load! The large loop enables simple attachment to the harness using a girth hitch.

- Length adjustable even under load
- Integrated KIWI SCREW carabiner for attachment to the anchor point
- Highly robust kernmantle construction
- Length adjustable from 15 to 120 cm

## 73909 SWITCH DOUBLE

bluesign  
PRODUCT

499 neon green

不对称，自我保护Y形挽索，采用动力绳 (SWIFT 48 Pro Dry 8.9 mm) 制造的可吸收一定冲击力。两臂的长度不一样 (75cm/40cm)，可用于自我定位，如下降时。大环通过套结连接安全带。

- 小巧的体积和低重量
- 高强度夹芯绳结构
- SWIFT 48：采用bluesign®认证材料
- 注意：不能用于飞拉达

Asymmetrical, self-belaying Y-lanyard made from energy-absorbing dynamic rope (SWIFT 48 Pro Dry 8.9 mm). The two webbing arms of different lengths (75 cm/40 cm) allow individual positioning and use, e.g. for abseiling. The large loop enables simple attachment to the harness using a girth hitch.

- Small pack size and low weight
- Highly robust kernmantle construction
- SWIFT 48: made from bluesign®-certified materials
- Please note: must not be used as a via ferrata set

## 73933 HMPE CORD SLING 6MM

017 night 300 blue 499 neon green

缝合的夹芯绳环，绳皮采用耐用的紧密编织的聚酯材料，较硬的扁带环能轻松穿过孔洞，而且作为抓结时也能产生足够的抓握力。HMPE绳芯强度很高，并且能保证长久的弯折后强度。

- 特殊的紧密编织，非常适合穿过孔洞
- 30cm型号特别适合作为抓结扁带环

*Sewn round sling made of kernmantle material. The tightly braided polyester sheath is abrasion resistant, stiffens the sling to make it easier to create threads, and generates a good clamping force when used as a prusik sling. The HMPE core is extremely strong and offers outstanding permanent flexural strength.*

- Particularly tightly braided, ideal for creating threads
- 30 cm version particularly suitable for use as a prusik sling

## AID CLIMBER

219 night-oasis

NEW

轻量化，五阶可调节长度绳梯，采用15mm聚酰胺扁带制造。顶部通过耐用的铝合金管提高了横向的硬度，以提高稳定性。其他阶梯采用加强的织物预成形结构，方便踩踏。底部阶梯上采用了弹性织带可将其永久固定在底部。

*Light, length-adjustable étrier made of 15 mm polyamide webbing with five large steps. The top step is stiffened with a durable aluminum coating for lasting dimensional stability. Thanks to the additional textile sheath, all other steps also have a stiffened structure, are pre-shaped to make them easier to stand on, and are reinforced. The elasticated strap on the top of the bottom step can be used to permanently secure this to a base.*

- 15mm宽、耐用的聚酯扁带
- 铝合金Slide Block卡扣能轻松调节长度至58cm
- 5个成形的稳定阶梯，顶部采用铝合金管使其整体都保持稳定
- 底部阶梯上的弹性织带能将其固定在底部
- 配有一个轻量化透气的网孔包用于储存
- 不是PPE

- 15-mm-wide, durable polyamide webbing
- Aluminum Slide Block buckle for easy length adjustment by up to 58 cm
- Five dimensionally stable steps; durable aluminum coating on the top step makes the entire étrier dimensionally stable
- Elasticated straps on the bottom step for securing to a base if necessary
- Comes with a light, breathable mesh bag for storage
- Not PPE certified

## HMS BULLETPROOF BELAY FG ECO

107 eco

耐用的保护主锁，来自我们采用内嵌钢结构的Bulletproof系列。内置的钢丝门杠能够防止锁扣在保护环中横向受力。档杆只能从上向下打开，防止保护环中脱出。小巧的设计和滑块锁门使得HMS BULLETPROOF BELAY ECO依然保持紧凑的结构，单手便可操作。

Highly robust belay carabiner with the proven steel insert from our Bulletproof series. The integrated spring bar reliably prevents the carabiner from twisting in the tie-in loop so as to eliminate the risk of cross loading. In addition, the bar can only be opened if pressed from above, preventing the tie-in loop from accidentally changing position. Thanks to the compact design and slide gate closure, however, the HMS BULLETPROOF BELAY ECO still has a slender profile and can be operated one-handed.

- 钢丝门档杆能让锁扣在保护时防止横向受力
- Keylock锁鼻能在扣入和取出时不发生钩挂
- 钢内嵌结构能抵抗绳索和挂片的磨损
- 环保银色版本：无镀层的环保设计

- Spring bar holds the carabiner in place when belaying to prevent cross loading
- Keylock closure mechanism for optimum handling when clipping and unclipping
- Steel insert prevents premature wear from rope friction or bolt hangers
- Eco colour version: particularly sustainable as non-anodized

- 有丝扣锁门，三段锁门和PermaLock锁门可选

Innovative screw gate carabiner with additional sleeve locking through the use of the smart PermaLock locking mechanism. Due to the integrated pressure lock, the carabiner's rotating sleeve can be blocked and is thus secured against unintentional opening. The OVAL POWER 2500 PERMALOCK therefore combines the safety of a locking carabiner according to category 3 of the German Alpine Club (DAV) provisions with the user-friendliness of a normal screw or snap carabiner. The oval shape makes it ideal for attaching rigging plates, pulleys, and ascenders, as well as for setting up anchor points.

- Keylock closure mechanism for optimum handling when clipping and unclipping
- Oval shape for optimum gear positioning

## AXIOM SLIDER

138 oasis

内置滑轮的锁扣。滑轮能降低绳索的摩擦，即使在受力下也能保证效率。AXIOM优化了结构，使得绳索始终能在滑轮上滑动。有滑块锁门或快挂锁门型号，滑轮在锁门打开的一侧，方便扣入绳索。

- 非常轻量化的结构
- 有快挂和滑块门型号可选
- 在受力下滑轮依然保证效率
- 优化结构设计，让绳索始终在滑轮上滑动
- 效率：86%

*Carabiner with integrated pulley in the spine. The pulley reduces rope friction to a minimum and maintains its function even under load. The optimized design of the AXIOM ensures that the rope is always ideally guided so that it can always run on the pulley. Available with a classic gate or the automatic and very compact Slider locking gate. The gate opens on the pulley side, which makes installing the rope easier.*

- Very lightweight construction
- Available as a gate or slider version
- Pulley maintains its function even under load
- Optimized design for perfect rope guidance in the carabiner at all times
- Efficiency: 86%

## 73802 NINETEEN G

138 oasis      329 icemint      663 slate

突破了20g的记录！Nineteen G是目前最轻的快挂锁，并且依然保持了强度。

- 非常轻量化的结构
- 轻量化的钢丝门在坠落时不会因为摆动而打开
- 高强度的铝合金，采用了特殊的硬质处理
- 紧凑的外形和小巧的体积

*The NINETEEN G is the lightest carabiner in the world—and makes no compromises on strength.*

- *Very lightweight construction*
- *Lightweight wire gates reduce the whiplash effect in the event of a fall*
- *Strong aluminium alloy, special hardening treatment*
- *Compact shape and minimal pack size*

货号N°.	重量 WEIGHT	断裂强度 BREAKING STRENGTH	颜色 COLOR	认证 CERTIFICATION
73802	19 g	20 / 7 / 7 kN	138 绿洲色, 329 薄荷蓝, 663 石板灰	EN 12275

## 71806 NINETEEN G SIXPACK

900 assorted colours

最轻的快挂单锁，6只装。

- 非常轻量化的结构
- 轻量化的钢丝门在坠落时不会因为摆动而打开
- 高强度的铝合金，采用了特殊的硬质处理
- 紧凑的外形和小巧的体积
- 不同颜色适配不同的塞子

*The lightest carabiner in the world in a sixpack.*

- *Very lightweight construction*
- *Lightweight wire gates reduce the whiplash effect in the event of a fall*
- *Strong aluminium alloy, special hardening treatment*
- *Compact shape and minimal pack size*
- *The color scheme fits the established camming devices*

**丝扣门**

锁扣都会采用的传统锁门，带有纹理的套筒能够轻松开关锁门，即使单手也很容易操作。丝扣门需要人为锁定来确保安全。

**Screwgate**

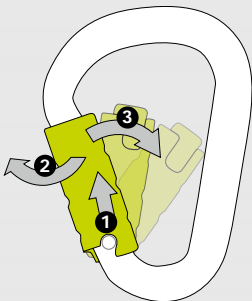

*These classic carabiners cover a wide range of uses. The easy-grip threaded sleeve allows the gate to be closed quickly, intuitively and one-handed if required. Screwgates have a manual locking mechanism which must be actively closed to ensure full safety.*

**双段锁门**

双段锁门的锁扣有一个旋转套筒，你需要将其旋转约90°才能打开锁门。双段锁门的锁扣属于自动锁扣。它们能够在松开锁门后自动关闭和锁定，可以单手操作，非常适合高安全性和快速操作的场合。

**Twist Lock**

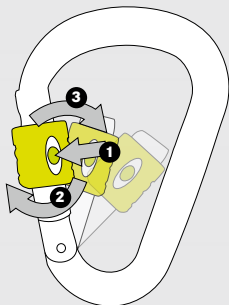

*Twist Lock carabiners have a twisting sleeve. You have to open them by turning the sleeve approximately 90° before you can open the gate. Twist Lock carabiners are auto-locking carabiners. They are self closing, shut automatically as soon as you release the gate and can still be operated with one hand. They are ideal for situations where both safety and speed are paramount.*

**三段锁门**

三段锁门的锁扣需要三个动作才能打开锁扣。其安全性比丝扣门和双段门的锁扣更高。但单手操作会稍微困难，需要进行练习。它们适合需要高安全性的场合。

**Triple Lock**

*Triple Lock carabiners require three separate actions to open the carabiner. This offers extra safety compared to screwgate and twist Lock carabiners. However, one-handed operation is pretty difficult and takes practice. They are ideal for situations where maximum safety is called for.*

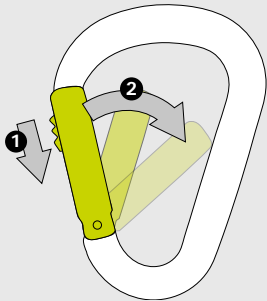

**Permalock锁门**

创新的丝扣门设计，在套筒上增加了一个锁定机构，便成为更安全的Permalock锁门。内置了按压开关，让旋转的套筒可以锁定，防止出现意外打开。Permalock的锁扣达到了德国登山协会（DAV）的第3类级别，同时结合了易用的普通丝扣门。

**Permalock**

*Innovative screw gate carabiner with an additional locking mechanism on the locking sleeve. This is made possible by the smart PERMALOCK locking mechanism. Due to the integrated pressure lock, the rotating locking sleeve of the carabiner gate can be blocked and is thus secured against unintentional opening. Thus the Permalock combines the safety of a locking carabiner, according to category 3 of the German Alpine Club (DAV) provisions, with the user-friendliness of a normal screw/snap carabiner.*

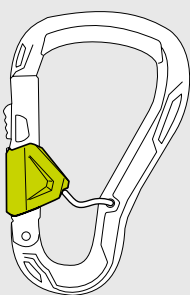

#### Slider Gate滑块门

这种新一代的锁扣将自动锁定内置到锁门中，Slider Gate滑块锁门是一种自动、快速、可单手方便使用的系统。当使用在快挂上时，Slider Gate锁门能降低绳索脱出的风险，非常适合重要的保护点，横移或暴露的部分使用。而且锁门上没有障碍结构，使得锁扣可以方便在锚点或保护器中转动，方便在保护站操作和保护。

#### **Slider gate**

*An automatic locking mechanism is integrated into the gate. The slider gate is auto-locking, quick, intuitive and can be operated with one hand. When used as a quickdraw, the slider gate minimizes the risk of accidental unclipping – perfect for precarious belay points, traverses or moral support on exposed sections. As there is no barrel that can get in the way, the carabiner can rotate freely in bolts and belay devices. This improves handling for better stance organisation or when belaying.*

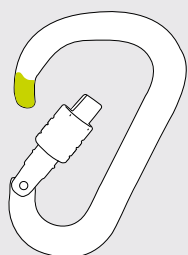

#### Belay Lock锁门

带有Belay Lock锁门的锁扣内置了一个钢丝门杆，能够防止在保护环中发生旋转，让保护始终在理想的位置上。这样能够防止横向受力。此外钢丝门杆是从上向下开的，能够防止保护环意外脱出。

#### **Belay Lock**

Carabiners with a Belay Lock gate have an integrated spring bar that reliably prevents them from twisting in the tie-in loop and keeps them in an ideal position for belaying. This prevents undesired cross loading. In addition, the bar can only be opened from above, preventing the tie-in loop from accidentally changing position.

# 结构 / CONSTRUCTIONS

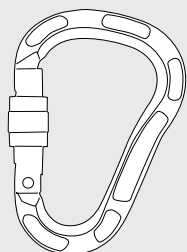

## Keylock锁鼻结构

所有的EDELRID锁扣都采用Keylock锁鼻结构。在锁扣上没有钩状结构，使得锁扣在钩取时更方便，不会与绳索，锚点，装备环发生钩挂。

## Keylock closure mechanism

*Almost all EDELRID carabiners are fitted with the keylock closure mechanism. This is a closure system without a nose in the body of the carabiner. This makes handling when clipping and unclipping easier, as the carabiner cannot get caught on ropes, anchor points or gear loops.*

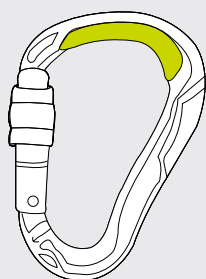

## H结构

H锁身结构能够更好的利用材料，将重量降至最低。锁扣采用H结构能够比全尺寸锁扣降低很多重量，而且保持相同的强度。同时大的半径接触面积能够降低锁扣和装备的磨损。

## H-profile

*H-profile construction ensures best possible use of material and minimal weight. Carabiners with an H-profile are considerably lighter than carabiners with a "full body", but with the same strength. At the same time, their large deflection radius prevents premature wear of carabiner and equipment.*

## Bulletproof耐磨结构

创新的铝合金锁扣上采用镶嵌的钢片，耐磨钢结构能在绳索和锋利边缘上更耐磨。锁扣其他部分采用铝合金，所以锁扣依然轻量，方便使用。

## Bulletproof

*Innovative carabiner with steel insert at the apex of the biner. The hard-wearing steel prevents premature wear from rope friction and burrs or sharp edges. The rest of the carabiner is made from aluminium, so it is still light and a joy to use.*

## 73808 BULLETPROOF SET

138 oasis

017 night

非常耐用的运动攀快挂，下方快挂内置了钢片，耐磨性能有了极大的提高。

- H结构能减少材料，降低锁扣的重量
- 采用keylock锁鼻的bullet快挂锁手感出众，不会发生钩挂
- 快挂的钢内嵌结构能抵抗绳索的磨损
- 高强度15/22 mm加宽聚酯酰胺快挂扁带
- Antitwist能够固定下方快挂

Our extremely robust sport climbing quickdraw set with a steel insert in the lower carabiner to prevent premature wear.

- H-profile construction ensures best possible use of material and minimal weight
- One bullet carabiner and one bulletproof carabiner with keylock closure for optimal handling when clipping/unclipping
- Steel insert in lower carabiner prevents premature wear due to rope friction
- High-strength 15/ 22 mm narrow/wide polyamide quickdraw sling
- Antitwist fixing to hold lower carabiner in place

## 73781 PURE PRO SET

627 slate-oasis

602 slate-icemint

采用keylock锁鼻的轻量化多用途快挂。适合运动攀，多段结组和磁线。

- 采用keylock锁鼻的两个PURE快挂锁手感出众，不会发生钩挂
- 高强度15/22 mm加宽聚酯酰胺快挂扁带
- H结构能减少材料，降低锁扣的重量
- Antitwist能够固定下方快挂

Light all-round quickdraw with keylock closure mechanism. Suitable for sport climbing, multi-pitch tours, and projecting.

- Two robust PURE carabiners with keylock closure system for optimal handling when clipping and unclipping
- High strength 15/22 mm narrow-wide quickdraw sling made of polyamide
- H-profile construction ensures the best possible use of material and minimal weight
- With ANTITWIST fixing on lower carabiner

货号N°.	重量 WEIGHT	尺寸 SIZE	颜色 COLOR
73781	111 g 116 g	12 cm 18 cm	627 石板灰-绿洲色 602 石板灰-薄荷蓝

## 73782 PURE SET

627 slate-oasis

602 slate-icemint

采用keylock锁鼻的耐用快挂，性价比极高。

- 采用keylock锁鼻的两个PURE快挂锁手感出众，不会发生钩挂
- 16mm聚酯扁带，Antitwist能够固定下方快挂

Robust quickdraw with keylock closure and outstanding value for money.

- Two robust PURE carabiners with keylock closure system for optimal handling when clipping and unclipping
- 16 mm polyester sling with ANTITWIST fixing on lower carabiner

货号N°.	重量 WEIGHT	尺寸 SIZE	颜色 COLOR
73782	105 g 111 g	10 cm 18 cm	627 石板灰-绿洲色 602 石板灰-薄荷蓝

73783

## PURE WIRE SET

602 slate-icemint

627 slate-oasis

轻量化高强度的钢丝门快挂，性价比极高。

*Lightweight and sturdy quickdraw with a wire gate on both carabiners and outstanding value for money.*

- 采用钢丝门，将重量降至最低
- 16mm聚酯扁带，Antitwist能够固定下方快挂

- Carabiners with wire gate to keep weight to a minimum
- 16 mm polyester sling with ANTITWIST fixing on lower carabiner

## 73803 NINETEEN G SET

138 oasis

017 night

市面上最轻的快挂。NINETEEN G SET极大的降低了装备重量。适用于登山或需要轻量化的路线上。

- 轻量化的钢丝门在坠落时不会因为摆动而打开
- H结构能减少材料，降低锁扣的重量
- 超轻Nineteen G快挂和11mm Dyneema®快挂扁带极大降低了重量
- 两个长度可选（10/18 cm）

*The lightest carabiner set on the market. The NINETEEN G SET will significantly reduce the weight of any rack. Ideal for alpine climbing or routes where every gram counts.*

- Wire gate on lower carabiner reduces the whiplash effect in the event of a fall
- H-profile construction ensures best possible use of material and minimal weight
- Minimal weight thanks to ultra-light Nineteen G carabiner and ultra-strong 11 mm Dyneema® quickdraw sling
- Available in two lengths (10/18 cm)

## MADE IN GERMANY

## 73752 MISSION SET

524 silver-icemint

606 silver-oasis

非常轻量化的快挂，用于登山或传统路线，两个长度可选14cm采用15/22 HMPE材料快挂扁带配有固定套，或60cm的8mm Dyneema®扁带。

- 非常轻量化的结构
- Keylock锁鼻能在扣入和取出时不发生钩挂

*An extremely light quickdraw set for alpine tours or trad climbing, available in two lengths: 14 cm with a 15/22 mm quickdraw sling made from HMPE with anti-twist and 60 cm with an 8 mm Dyneema® sling.*

- Very lightweight construction
- Keylock closure mechanism for optimum handling when clipping and unclipping

## MADE IN GERMANY

## TOPPER STATION

017 night

适用于所有岩馆的非常安全的锚点。大的钢制接触面能降低绳索和锚点的磨损。

- 三脚架结构能够支撑出一段距离，降低对岩板和绳索的磨损
- 所有的受力金属部件采用高强度，防腐蚀钢制造（符合EN959标准2类）
- 锁扣可以在任何方向自由转动，减低绳索缠绕，防止扭曲挂锁
- 创新的锁门结构防止扣入两根绳索，以及防止脱出，绳索只能在锚点中拉动
- 用于固定顶绳保护站，锁门可以通过螺丝固定
- 可拆卸的摩擦块配有磨损指示，大半径的接触面能降低绳索的磨损

*The non-plus-ultra concerning safety for all gym anchors. The large inner radius of the steel carabiner ensures far lower material wear on the rope and top anchor.*

- *The tripod bracket reduces the wear on the wall and the rope by providing the necessary clearance from the wall*
- *All load-bearing metal parts are made from high-strength, corrosion-resistant steel (category 2 in accordance with EN 959)*
- *The carabiner can move freely in all directions to reduce tangles and make twisted clipping impossible*
- *The innovative gate mechanism prevents double clipping and unhinging; the rope can only be pulled out through the anchor*
- *For fixed top-rope stations, the gate can be fixed using a screw*
- *Replaceable radius blocks with wear indicators provide an extra large top anchor radius and prevent rope wear*

## TOPPER STATION REFIT

017 night

创新的岩馆顶绳保护系统，可以安装在前面，不需要对岩壁进行改造。

- 锁扣可以在任何方向自由转动，减低绳索缠绕，防止扭曲挂锁
- 用于固定顶绳保护站，锁门可以通过螺丝固定
- 可拆卸的摩擦块配有磨损指示，大半径的接触面能降低绳索的磨损
- 岩馆工作人员可以轻松拆除更换磨损部件（摩擦块，锁门弹簧）
- 设计能够支撑出一段距离，降低对岩板和绳索的磨损
- 所有的受力金属部件采用高强度，防腐蚀钢制造（符合EN959标准2类）

*Innovative climbing gym top-rope anchor for refitting an existing anchor system. Can be installed from the front, without requiring modification to the wall.*

- *The carabiner can move freely in all directions to reduce tangles and make twisted clipping impossible*
- *The innovative gate mechanism prevents double clipping and unhinging; the rope can only be pulled out through the anchor*
- *For fixed top-rope stations, the gate can be fixed using a screw*
- *Replaceable radius blocks with wear indicators provide an extra large top anchor radius and prevent rope wear*
- *Gym operators can easily replace wear and tear parts (radius blocks, gate springs)*
- *Designed to ensure the correct distance (clearance) from the wall, reducing wear on the wall and wear on the rope*
- *All load-bearing metal parts are made from high-strength, corrosion-resistant steel (category 2 in accordance with EN 959)*

**MADE IN GERMANY**

## 73826 JIM STEEL SET

017 night

非常耐用的岩馆快挂，采用钢制快挂锁。有弯门和钢丝门可选。

- 橡胶保护套能降低噪音
- 耐磨的保护套还能防止扁带磨损
- 耐用的聚酯扁带
- 内部的磨损指示采用红色聚酯材料
- Jim Steel Set采用创新的快挂连接盒：降低墙壁磨损，防止让手指受伤，降低噪音

*Extremely robust climbing gym quickdraw set with steel carabiner. Available with either a full gate or wire gate carabiner.*

- Rubber abrasion protector minimizes noise
- Abrasion protector acts as a spacer and minimizes sling wear
- Durable polyester sling
- Internal wear indicators made of red polyester
- Jim Steel Set with innovative hanger plate: minimizes wall wear, prevents trapped fingers, and reduces noise

**MADE IN GERMANY**

## 73828 JIM STEEL BENT SET

017 night

017 night

非常耐用的岩馆快挂，采用钢制快挂锁和磨损指示扁带。

- 橡胶保护套能降低噪音
- 耐磨的保护套还能防止扁带磨损
- 耐用的聚酯扁带
- 内部的磨损指示采用红色聚酯材料
- Jim Steel Wire Set采用8mm梅陇锁连接

*Extremely robust climbing gym quickdraw set with steel carabiner and wear indicator.*

- Rubber abrasion protector minimizes noise
- Abrasion protector acts as a spacer and minimizes sling wear
- Durable polyester sling
- Jim Steel Wire Set with 8 mm screw link

## 72017 JIM STEEL BENT

006 silver

用于岩馆的耐用钢制快挂。

Highly durable steel carabiner for use in gyms.

- 钢制锁身非常耐磨
- 有keylock和钢丝门可选

- Steel body for minimal wear
- Available with Keylock or wire gate closure

货号N°.	重量 WEIGHT	断裂强度 BREAKING STRENGTH	颜色 COLOR	认证 CERTIFICATION	包装单位 PACKING
72017 Bent	150 g	30 / 10 / 10 Kn	006 银色	EN 12275	5

## 72018 JIM HANGER

006 silver

创新的快挂连接盒，岩馆挂片锚点的新选择。

Clever hanger plate as an alternative to the current anchor points on the climbing wall.

- 直接将快挂扁带和岩壁连接，不需要梅脱锁
- 不会出现梅脱锁磨损扁带和岩壁的情况
- 可以通过螺栓轻松安装和更换快挂扁带
- 塑料盖能防止使用者夹伤，降低了受伤的概率

- Direct attachment of the quickdraw sling to the hanger eliminates the need for interim screw link connectors
- No climbing wall and sling wear through contact with screw link connectors
- Bolts make the quickdraw sling easy to attach and replace
- The plastic cover prevents users from grasping the anchor point, thus reducing the risk of injury

## 73743 SPOC

138 oasis

超小的单向制停滑轮，设计用于提拉重物、冰裂缝救援或作为紧急上升器

- 凸轮可以被固定在开启状态，让滑轮变成单滑轮
- 轮径：20mm
- 适合直径7.0至11.0mm绳索，包括EDELRID RAP LINE
- 滚珠轴承带来很高的效率（92%）
- 凸轮优化了在冰冻和泥泞的绳索上的抓握力

Ultra-light pulley with backstop. Designed for lifting loads, crevasse rescue operations, or as an emergency ascender.

- The backstop can be fixed in the open position in order to use the device as a simple pulley
- Pulley diameter: 20 mm
- Suitable for ropes with a diameter of 7.0 to 11.0 mm as well as for the EDELRID RAP LINE
- Ball bearing pulleys for high efficiency (92%)
- Cams for optimal grip on iced or muddy ropes

MADE IN GERMANY

73743	60 g	15 kN	138 绿洲色	EN 567, EN 12278

## 71789 TURN

300 blue

小巧实用的滑轮用于绳索的变向和中等重量的负重。采用了移动侧板，而且可以使用D形锁扣连接。

- 小巧，轻量化结构
- 用于直径最大13.0 mm
- 铝合金滑轮
- 滑轮直径（外径/内径）：29/19 mm
- 移动侧板方便连接和拆卸
- 尺寸：75 x 44 x 29 mm

Small, practical pulley for block and tackles as well as directional anchors with fabric ropes and medium loads. Thanks to the pivotable flange, the pulley can also be used in D-shaped carabiners.

- Compact, lightweight construction
- For rope diameters up to 13.0 mm
- Aluminium pulley
- Pulley diameter (outside/inside): 29/19 mm
- Flexible side pieces for easy rigging and removal
- Dimensions: 75 x 44 x 29 mm

货号N°.	重量 WEIGHT	最小断裂强度 MINIMUM BREAKING STRENGTH	颜色 COLOR	认证 CERTIFICATION
71789	94 g	30 kN	300 蓝色	EN 12278

## 71791 RAIL

073 titan

滚珠轴承双滑轮，用于钢缆和绳索。

- 滚珠轴承滑轮带来高效率
- 连接孔可同时连接三把锁扣
- 不锈钢滑轮
- 可用于钢缆（最大12.0mm）或静力绳（最大13.0mm）
- 尺寸：81 x 106 x 32 mm
- 滑轮直径（外径/内径）：38/27 mm

Ball bearing-mounted double pulley for use on steel cables or static ropes.

- Ball bearing pulleys for high efficiency
- Attachment point for up to 3 carabiners
- Stainless steel rollers
- For steel cables (up to 12.0 mm) or static ropes (up to 13.0 mm)
- Dimensions: 81 x 106 x 32 mm
- Pulley diameter (outside/inside): 38/27 mm

71783

## VORTEX

130 oasis-slate

小巧的滚珠轴承方向节。防止承重旋转时绳索发生缠绕。

Compact ball-bearing mounted swivel. Prevents ropes from twisting when the load is turning on its own axis.

- 即使在负重下也能可靠旋转
- 尺寸：86×39 mm

- Small, ball-bearing-mounted swivel rotates reliably even under high loads
- Dimensions: 86 x 39 mm

货号N°.	最小断裂强度 MINIMUM BREAKING STRENGTH	重量 WEIGHT	尺寸 SIZE	颜色 COLOR	认证 CERTIFICATION

88253 / 88254

## HAND CRUISER LEFT / RIGHT

006 silver

017 night

人体工程学结构手式上升器，能带来舒适的绳索上升。弯曲设计提高了舒适度和在系统中的摩擦。大连接孔可连接多把锁扣，中间的小孔方便连接导向锁扣。上升时另一只手可以舒适地抓握 HAND CRUISER 手升的上方。

Ergonomically shaped hand ascender for a comfortable ascent on the rope. The curved design increases comfort and reduces friction in the system. A large eyelet allows several carabiners to be attached; a smaller eyelet slightly higher is ideal for setting up a directional anchor. Besides, the secondary hand can comfortably grasp the HAND CRUISER at the top during ascent.

- 双手抓握时，另一只手可以抓握上升器的上方
- 凸轮优化了在冰冻和泥泞的绳索上的抓握力
- 左右手颜色不同，方便区分。
- 用于8.0-13.0mm直径夹芯绳

- The upper part of the ascender can be grasped with the other hand for two-handed ascents
- Cams for optimal grip on iced or muddy ropes
- Right-hand/ left-hand version in different colours for easy identification
- For 8.0-13.0 mm diameter kernmantel ropes

货号N°.	重量 WEIGHT	颜色 COLOR	认证 CERTIFICATION

## 73742 GIGA JUL

663 slate

目前最多用途的保护器。GIGA JUL是一款标准管式和辅助制动管式的二合一保护器。通过调节块可以在辅助制动和手动制动间切换。可用于保护和下降，特别是登山环境。

- 保护跟攀时可以使用锁扣通过小孔进行释放
- 适合7.1-10.0mm的半绳和对绳
- 混合结构设计：框架采用超轻的铝合金，磨损区域则采用不锈钢制造
- 向导模式：能够轻松快速的下降和在保护站使用半绳保护跟攀
- 辅助制动模式：在先锋攀止坠时能带来辅助制动
- 在辅助制动时通过拇指抬起前端能够迅速送绳

The most versatile ever belay device. The GIGA JUL is a standard and assisted braking tuber in one. The assisted braking function which supports the braking force can be activated or disabled by an intelligent mechanism. For situation-dependent belaying and abseiling, especially in alpine terrain.

- Small eyelet for releasing unit with a carabiner when bringing up your partner
- Suitable for 7.1-10.0 mm double and twin ropes
- Intelligent hybrid design: body made of ultra-light aluminum, areas susceptible to abrasion made of robust stainless steel
- Guide mode: simple and rapid abseiling and bringing up seconds plus comfortable belaying from a belay station as a doubled rope
- Assisted braking guide mode: brake boost for catching falls in leader mode
- Rope can be paid out faster in assisted braking guide mode by holding the device in the "open" position with the thumb

73742	121 g	663 石板灰	EN 15151-2

## 73831 MEGA JUL

663 slate

我们的多用途轻量化保护器/下降器，采用耐用的不锈钢制造。

- 新的保护器结构提高了辅助制动效果，帮助保护员更好地制停先锋坠落
- 采用拇指环能更好地送绳给先锋攀者
- 保护跟攀模式下能用一把锁扣通过小孔进行解锁
- 适用于保护先锋攀，保护一或两名跟攀者，以及进行下降
- 高强度，耐用，不锈钢结构，优化的外形使其重量很轻
- 适合绳索直径7.8-10mm

Our versatile, lightweight, and durable stainless steel belay device and descender.

- The increased braking effect of the new device geometry assists the belayer when arresting a fall as a leader
- Faster rope payout when lead climbing thanks to the thumb-loop-based operation
- Additional eyelet for unlocking the device in follower mode using a carabiner
- Suitable for belaying a leader, bringing up one or two followers, and rappelling
- Robust, abrasion-resistant, stainless steel structure with a minimal weight thanks to the optimum shape
- Suitable for ropes with a diameter of 7.8 to 10.0 mm

MADE IN GERMANY

## 73832 NANO JUL

663 slate

我们新款的轻量化保护器，专门为半绳和对绳设计。NANO JUL是一款手动制动保护器，有优异的制动性能。优化的不锈钢结构非常耐磨，同时保证了轻量化。

- 用于登山的管式保护器，有着优异的制动性能，适合使用低直径的半绳技术
- 保护跟攀模式下能用一把锁扣通过小孔进行解锁
- 适用于保护先锋攀，保护一或两名跟攀者，以及进行下降
- 高强度，耐用，不锈钢结构，优化的外形使其重量很轻
- 适合绳索直径7.1-8.9mm

Our new, lightweight belay device specially designed for use with thin half and twin ropes. The NANO JUL is a manual braking device with outstanding braking effect. The optimized geometry enables the use of abrasion-resistant stainless steel while retaining a low overall weight.

- Guide tuber for alpine tours with outstanding braking effect that enables the use of the half-rope technique even with small rope diameters
- Additional eyelet for easily unlocking the device in follower mode using a carabiner
- Suitable for belaying a leader, bringing up one or two followers, and rappelling
- Robust, abrasion-resistant, stainless steel structure with a minimal weight thanks to the optimum shape
- Suitable for ropes with a diameter of 7.1 mm to 8.9 mm

MADE IN GERMANY

71832 JUL<sup>2</sup>

138 oasis

全新的单绳高制动力保护器。优化了MEGA JUL的结构，方便能够在较粗的绳索上进行保护。

*Innovative belay device with high braking performance for single ropes. The optimized MEGA JUL geometry ensures easy and secure belaying even with thicker ropes.*

- 框架采用高品质不锈钢
- 优化了结构方便新手操作
- 高制动力帮助保护员止坠先锋坠落
- 通过拇指抬起前端能够迅速送绳
- 手感出众，即使使用较粗的绳索
- 适合8.9-11mm单绳

- Body made of high-quality stainless steel
- Optimized geometry ensures easy operation even for beginners
- High braking performance assists the belayer with leader falls
- Rope can be paid out faster to a leader by holding device in the 'open' position with the thumb
- Perfect handling, even for ropes with a larger diameter
- Suitable for 8.9-11.0 mm single ropes

MEGA JUL BELAY KIT BULLETPROOF SCREW

138 oasis

保护器套装包括一个MEGA JUL保护器和一个HMS BULLETPROOF SCREW FG锁扣。

*Belay set comprising a MEGA JUL belay device and an HMS BULLETPROOF SCREW FG carabiner.*

- 保护跟攀模式下能用一把锁扣通过小孔进行解锁
- 适用于保护先锋攀，保护一或两名跟攀者，以及进行下降
- 能用拇指让保护器保持“打开”状态给先锋攀者快速给绳
- 高强度，耐用，不锈钢结构，优化的外形使其重量很轻
- 特别的辅助制动性能帮助保护员更好地制停先锋坠落
- 适合绳索直径7.8-10mm

- Additional eyelet for easily unlocking the device in follower mode using a carabiner
- Suitable for belaying a leader, bringing up one or two followers, and rappelling
- Faster rope payout when lead climbing as the device can be "kept open" with the thumb
- Robust, abrasion-resistant, stainless steel structure with a minimal weight thanks to the optimum shape
- The particularly high braking effect assists the belayer when arresting a fall as a leader
- Suitable for ropes with a diameter of 7.8 to 10.0 mm

MADE IN GERMANY

## 73787 JUL<sup>2</sup> BELAY KIT BULLETPROOF BELAY ECO

107 eco

专门用于运动攀的保护器套装。包括JUL<sup>2</sup>保护器和 HMS BULLETPROOF BELAY ECO锁扣。

- 防翻转锁扣配有钢片能够提高耐磨性
- 框架采用不锈钢制造
- 优化了结构方便新手操作
- 适合8.9-11mm单绳
- 通过拇指抬起前端能够迅速送绳
- 高制动力帮助保护员止坠先锋坠落

*Belay kit specially designed for sport climbing. Comprises a JUL<sup>2</sup> belay device and an HMS BULLETPROOF BELAY ECO carabiner.*

- Cross-loading-proof carabiner with a steel insert in the spine to prevent premature wear
- Body of the JUL<sup>2</sup> made from stainless steel
- Optimized geometry ensures easy operation even for beginners
- Suitable for 8.9-11.0 mm single ropes
- Rope can be paid out faster to a leader by holding device in the 'open' position with the thumb
- High braking performance assists the belayer with leader falls

MADE IN GERMANY

## 73732 JUL<sup>2</sup> BELAY KIT BULLETPROOF TRIPLE

329 icemint

保护器套装包括JUL<sup>2</sup>保护器和HMS BULLETPROOF TRIPLE FG锁扣。

- 框架采用高品质不锈钢
- 优化了结构方便新手操作
- 手感出众，即使使用较粗的绳索
- 适合8.9-11mm单绳
- 通过拇指抬起前端能够迅速送绳
- 高制动力帮助保护员止坠先锋坠落

*Belay set containing JUL<sup>2</sup> belay device and HMS BULLETPROOF TRIPLE FG carabiner.*

- Body made of high-quality stainless steel
- Optimized geometry ensures easy operation even for beginners
- Perfect handling, even for ropes with a larger diameter
- Suitable for 8.9-11.0 mm single ropes
- Rope can be paid out faster to a leader by holding device in the 'open' position with the thumb
- High braking performance assists the belayer with leader falls

## 75214 EDDY

017 night

操作简单的半自动保护器带有辅助制动功能，为运动攀和室内攀岩带来最高的安全性。

- 配有防慌乱功能能够更安全地进行下降控制
- 大的下降手柄能更好地控制下降
- 简单安全，方便装绳和操作（设备上有图示）
- 适合9-11mm绳索

*Easy-to-operate semi-automatic belay device with assisted braking and maximum safety for sport and indoor climbing.*

- Controlled descent with an emergency brake system eliminates the 'panic pull' syndrome
- Large lowering lever to ensure controlled descents
- Simple and safe, easy to thread, logical operation (shown on device)
- Suitable for 9.0-11.0 mm diameter ropes

货号N°.	重量 WEIGHT	颜色 COLOR	认证 CERTIFICATION
75214	360 g	017 暗黑色	EN 15151-1

73829

# OHM

138 oasis

全新第二代OHM，通过数个升级使其使用更简单。辅助制动能帮助体重差较大的攀岩搭档提高保护的制动力，采用了万向节使其活动更加灵活，这样就不用再纠结第一把快挂的方向。锁定系统能防止设备意外打开，能更方便将绳索装入，以及在下降时将绳索取出。

*The second generation of our innovative and successful OHM is easier to use than ever thanks to a number of updates. The assisted-braking resistor for increasing the braking effect when climbing in rope teams with major weight differences has a swivel joint that improves the device's freedom of movement. As a result, the clipping direction no longer matters when the device is clipped to the first bolt. The locking system prevents the device from opening accidentally and makes it far easier to insert the rope and remove the device when lowering.*

- 降低传递到保护员身上的拉力
- 能更轻松地下放更重的攀爬者
- 安装在第一个锚点上
- 当在第一个锚点上坠落后能降低坠地的风险
- 不会对先锋攀造成干扰（送绳时不会有摩擦力）
- 相当于让保护员加重25kg
- 保护员最小体重：40kg
- 适用于单绳8.9-11mm直径

- Far lower forces are exerted on the belayer
- Lowering a heavier person in a controlled manner is far easier
- Installed in the first bolt of the safety chain
- The device reduces the risk of a collision when falling on the first bolt
- Handling not restricted when lead climbing (no rope friction when paying out the rope)
- "Makes the belayer 25 kg heavier"
- Minimum belayer weight: 40 kg
- For single ropes with a diameter of 8.9 - 11.0 mm

## RAGE

219 night-oasis

用于混合路线和攀冰的高水平冰镐。极限的人体工程学手柄能够精确入冰和钩挂石头。冰镐的手柄可以通过一个垫块调节，方便小手或者薄手套时使用。TPR材料可以保证上下稳固抓握。新的结构设计，镐尖降低了冰块碎裂。镐尖非常结实，带来高承重能力（8kN）。

- 极限的弯曲手柄和镐尖下的空间帮助在任何情况下能够精确挥镐
- 人体工程学手柄带来不同的手握姿势，让挥镐更轻松
- 可承受负荷的钢制镐尖（6kN），配有孔可连接锁扣
- 硬化钢镐尖减少冰的碎裂
- 配重块可以安装在镐尖提高穿透力
- 模块化系统：多种附件方便不同的人员需求和使用环境
- 可以选配用于混合攀爬路线的镐尖
- 配有抓握胶带和内六角扳手

An extreme tool for demanding mixed routes and ice. The exceptionally ergonomic handle enables accurate placement and effective penetration of rock and ice. The axe's handle can be adjusted by installing the included spacer to enable smaller hands to use it or when climbing without or with thin gloves. The TPR material ensures good grip both on the top and bottom grips. The Mixed Blade with more teeth and profile on the head for under-hand grips and for blocking in cracks features increased material thickness for good torsional strength and more sharpening cycles. The steel spike is designed to be particularly robust and load-bearing (8 kN).

- Aggressively curved shaft provides additional clearance, while the balanced construction ensures accurate placement and penetration on rock and ice
- Modular construction can be adapted to suit all uses and conditions
- Supplied with grip tape and allen key
- Ergonomically-shaped handle with finger hole for a secure grip when swimming
- Load-bearing spike (8kN) made of steel with opening for attaching a carabiner
- Hardened steel waterfall pick for minimal shattering
- Accelerator that can be optionally mounted on the pick to increase impact force
- Matching pick for mixed climbing available as an optional extra

219 night-oasis

219 night-oasis

多用途冰镐，可用于技术登山和攀冰。人体工程学手柄保证冰镐能够稳定握住。采用新的结构，镐尖能够减少冰破损。镐尖非常结实，带来高承重能力（8kN）。

- 弯曲手柄结构能提高穿透力和在冰、岩上的精确性
- 可承受负荷的钢制镐尖（6kN），配有孔可连接锁扣
- 硬化钢镐尖减少冰的碎裂
- 配重块可以安装在镐尖提高穿透力
- 模块化系统：多种附件方便不同的人员需求和使用环境
- 有铲头和锤头可选（两者重量相同）

An all-round ice tool designed for technical mountaineering and ice-climbing. The ergonomically shaped grip ensures the tool can be firmly held. Thanks to its new geometry, the ice pick causes minimal ice shattering. The steel spike is designed to be particularly robust and load-bearing (8 kN).

- Modular construction can be adapted to suit all uses and conditions
- Curved shaft geometry for improved penetration and precise placement on ice and rock
- Available with adze or hammer (both weigh exactly the same)
- Load-bearing spike (8kN) made of steel with opening for attaching a carabiner
- Hardened steel waterfall pick for minimal shattering
- Accelerator that can be optionally mounted on the pick to increase impact force

## ATTILA TEC

663 slate

结合了经典的向导冰镐，更技术的结构适合陡峭的冰壁。可折叠的掌托适合技术使用或不使用腕带时的攀爬

- 稍微弯曲的铝合金镐身，和硬化镐尖适合陡坡和登山环境
- 硬化钢镐尖配有孔可连接锁扣
- 人体工程学造型的热塑握柄头能够防止你在使用冰镐时冻僵手
- 专利的可折叠掌托（不需要额外工具）
- 中间弯曲点可以进行T锚点设置
- 配有抓握胶带
- 配重块可以安装在镐尖提高穿透力

Combining the advantages of a classic guides' ice tool with a more technical design for steep ice. The foldout hand rest is ideal for more technical passages or leashless climbing.

- Slightly curved aluminium shaft and hardened steel pick make light work of steep, alpine terrain
- Hardened steel spike with opening to accommodate a carabiner
- Ergonomically-shaped thermoplastic grip stops your hands freezing when plunging on the uphill
- Patented, fold out hand rest (no tools required)
- Centroid marking for T-anchor set up
- Grip tape supplied
- Accelerator can be fitted to improve penetration in hard ice

## BEAST LITE AUTO

118 oasis-icemint

NEW

将最顶级的性能和最轻的重量进行结合：Beast Lite适用于陡峭环境，不管是攀冰或混合地形。其独特的铝合金框架和加硬钢前齿的结合使其成为目前市面上最轻的冰爪。

- 鞋码尺寸（包括短连接桥）：约EU 34-45码。有加长连接桥可选EU 42 - 50码（需另购）。注意：根据不同的品牌，鞋码的尺寸会有出入，所以此鞋码建议不能完全保证正确。
- 包括耐用的阻雪板
- 采用全卡固定（兼容所有EDELRID的固定系统）
- 非常轻量化，可靠，采用3D的硬质铝合金设计
- 硬化的专利前齿，能轻松咬合陡峭冰壁
- 建议使用环境：混合的垂直到屋檐地形，也适合高山的攀冰线路，垂直齿不会接触到岩石的环境
- 建议使用者最大体重：90kg
- 可轻松快速地从双前齿转换为单前齿：只需要一个螺丝就能分别更换前齿
- 配有冗余织带的固定系统
- 包括两个额外的短前齿，用于更换
- 兼容所有EDELRID的冰爪配件

Top performance and minimum weight combined: the Beast Lite is the go-to option for steep terrain, whether for ice or mixed climbs. Thanks to the unique combination of an aluminum body and front points made of hardened steel, these are currently the lightest crampons on the market.

- Shoe size (short bridge included): approx. EU 34 - 45. Optionally available with long bridge: EU 42 - 50 (not included). Please note: The sole length of shoe models from different manufacturers can sometimes vary greatly. The shoe sizes specified can therefore not always be guaranteed.
- Robust anti-bot plates included
- With automatic bindings (compatible with all EDELRID binding systems)
- Extremely light and stable thanks to the three-dimensional design of the hardened aluminum
- Hardened and patented-registered steel front points for the ultimate bite in steep ice
- Recommended area of use: vertical to overhanging mixed and ice climbing routes as well as high mountain tours without rock contact from the vertical points
- Recommended maximum user weight: 90 kg
- Quick and easy conversion from dual point to monopoint: each front point can be separately replaced with just one screw
- Strap keeper for stowing away webbing
- Comes with two additional short front points for changing the set-up as desired
- Compatible with all EDELRID crampon parts

## NEMO HYBRID AUTO

118 oasis-icemint

NEW

轻量化技术冰爪，用于滑雪旅行和高山攀登。结合了高性能钢制前掌和铝合金后掌，让NEMO HYBRID AUTO保证了结实耐用的同时依然保持很轻的重量和打包体积。

- 鞋码尺寸：约EU 36-48码。注意：根据不同的品牌，鞋码的尺寸会有出入，所以此鞋码建议不能完全保证正确。
- 耐用的阻雪板不需要螺丝就能连接
- 织物连接桥能降低重量和打包体积
- 可以从全卡转换为半卡固定（包括）
- 耐用的有镀层的高质量钢（前掌）
- 非常轻量化，可靠，采用3D的硬质铝合金设计（后掌）
- 3D前齿能保证陡峭冰面的咬合和在雪面的耐用性
- 方便使用的冗余织带固定系统能够完全打开

Light, technical crampons for ski touring and high mountain tours. The combination of a high-end steel toe unit and an aluminum heel unit makes the NEMO HYBRID CAR robust and durable while also offering a low weight and minimal pack size.

- Shoe size: approx. EU 36 - 48. Please note: The sole length of shoe models from different manufacturers can sometimes vary greatly. The shoe sizes specified can therefore not always be guaranteed.
- Robust anti-bot plates attachable without screws included
- Textile bridge for a low weight and small pack size
- Convertible from an automatic to a semi-automatic binding (included)
- Durably coated high-quality steel (toe unit)
- Extremely light and stable thanks to the three-dimensional design of the hardened aluminum (heel unit)
- Three-dimensional front points for optimum hold on steep ice and good wearability on snow
- Easy-to-use strap keeper for stowing away webbing can be fully opened
- Compatible with all EDELRID crampon parts

## NEMO LITE AUTO

329 icemint

NEW

市面上最轻的同类冰爪之一，超轻的NEMO LITE AUTO采用织物连接桥将两个硬质铝合金前后掌进行连接，重量只有300g，可以折叠成非常小的尺寸。非常适合登山滑雪或登山时的快速移动，以及那些对重量有苛刻要求的攀登者。

- 鞋码尺寸：约EU 36-48码。注意：根据不同的品牌，鞋码的尺寸会有出入，所以此鞋码建议不能完全保证正确。
- 超轻的铝合金结构，市面上最轻的冰爪之一
- 织物连接桥能降低重量和打包体积
- 不需要工具便能调节尺寸
- 兼容登山靴和滑雪靴（全卡）
- 方便使用的多余织带固定系统能够完全打开

One of the lightest fully-fledged crampons on the market. The ultralight NEMO LITE AUTO combines hardened aluminum (toe and heel units) with a textile bridge, weighs just 300 g, and can be folded up to an extremely compact size. The perfect choice for those who move quickly when ski mountaineering or mountain climbing and for whom every gram of gear counts.

- Shoe size: approx. EU 36 - 48. Please note: The sole length of shoe models from different manufacturers can sometimes vary greatly. The shoe sizes specified can therefore not always be guaranteed.
- Ultralight aluminum design and one of the lightest crampons on the market
- Textile bridge for a low weight and small pack size
- Simple size adjustment without tools
- Suitable for crampon-compatible alpine and ski boots (automatic binding)
- Easy-to-use strap keeper for stowing away webbing can be fully opened

## DEMON AUTO

219 night-oasis

NEW

我们的高端型号冰爪，采用高质量钢和优化的冰爪齿设计。重新设计的前齿结构和定位能让前齿有更好的指向性，保证了在陡峭环境良好的咬合性，不管是攀冰或混合攀登，不管是单前齿还是双前齿模式。

- 鞋码尺寸（包括长连接桥）：约EU 38-50码。有短连接桥可选EU 32-42码（需另购）。注意：根据不同的品牌，鞋码的尺寸会有出入，所以此鞋码建议不能完全保证正确。
- 能在各类冰面（冰笋、冰挂）上带来稳定的支撑效果（即使是单前齿），因为采用了专门的前齿结构和定位。
- 耐用的阻雪板不需要螺丝就能连接
- 耐用的弹簧钢连接桥
- 模块灵活使用，可以使用半卡固定，软连接，全卡固定（包括）
- 小巧的打包体积，缩短了冰爪长度
- 硬化的专利前齿，能轻松咬合陡峭冰壁
- 建议的使用环境：垂直和屋檐混合攀爬，攀冰路线和陡峭的北壁
- 可轻松快速地从双前齿转换为单前齿：只需要一个螺丝就能分别更换前齿
- 全新的织带卡扣，配有快速解锁机构
- 配有两个额外的短前齿用于更换
- 兼容所有EDELRID的冰爪配件

Our high-end model made of high-quality steel with optimized point positioning. The revised geometry and position of the robust front points provides perfect alignment on the crampon and ultimate bite in steep terrain, whether for ice or mixed climbing and whether in a monopoint or dual point set-up.

- Shoe size (long bridge included): approx. EU 38 - 50. Optionally available with a short bridge: EU 32 - 42 (not included). Please note: The sole length of shoe models from different manufacturers can sometimes vary greatly. The shoe sizes specified can therefore not always be guaranteed.
- Stable support (even as monopoint) for all ice types (cauliflower, chandelier) thanks to the special point geometry and positioning.
- Robust anti-bot plates attachable without screws included
- Durable spring steel bridge
- Full flexibility thanks to semi-automatic, soft, and automatic bindings (included)
- Minimal pack size thanks to reduced component length
- Hardened and patented-registered steel front points for the ultimate bite in steep ice
- Recommended area of use: vertical to overhanging mixed and ice climbing routes and steep north faces
- Quick and easy conversion from dual point to monopoint: each front point can be separately replaced with just one screw
- New safety strap buckle with a quick-release mechanism
- Comes with two additional short front points for changing the set-up as desired
- Compatible with all EDELRID crampon parts

## 49280 WO DOLO JACKET

Leichte Wärme, kleines Packmaß und ganz viel Bewegungsfreiheit zeichnen diese Daunenjacke aus. Die recycelten Daunen (700 cuin) stecken in einer speziellen Kammernkonstruktion, die zusammen mit dem stretchigen Obermaterial einen uneingeschränkten Bewegungsradius ermöglicht. Die WO DOLO JACKET liefert ein angenehmes Körperklima und Wärme und funktioniert als Außenjacke und Midlayer.

*This down jacket offers light warmth, a small pack size, and outstanding freedom of movement. The recycled down (700 cuin) fills a special chamber construction that comes together with the stretchy upper to offer an unrestricted range of motion. The WO DOLO JACKET offers a pleasant body climate and warmth and can be worn as an outer jacket or a midlayer.*

084 river

- Wasserabweisende DWR-Imprägnierung, C-0

## WO ONSET T-SHIRT

284 steel

Modisches Rundhals-T-Shirt in legerer Passform mit großer Grafik auf der Brust, Rückenprint oder kleinem Print in Brusttaschenhöhe. Hergestellt aus recycelter Baumwolle, die aus Postconsumerabfällen stammt. Somit ist das Material besonders verantwortungsbewusst, denn es hat bereits einen Lebenszyklus durchlaufen, bevor es im WO ONSET T-SHIRT erneut zum Einsatz kommt.

*Fashionable round-neck T-shirt with a casual fit featuring a large graphic on the chest, a print on the back, or a small print at chest pocket height. Made of recycled cotton from post-consumer waste. This makes the material extremely responsible as it has already completed one life cycle before being reused in the WO ONSET T-SHIRT.*

49246 WO DY.EN.A PANTS

017 night

Sportliche, leichte und besonders funktionale Kletterjeans mit einem innovativen Materialmix. Der Dyneema®-Anteil im Stoff macht die DY.EN.A PANTS bis zu 66% reißfester als eine vergleichbare Hose mit klassischem Jeans-Stoff. Zudem ist der Stoff besonders abriebfest, was die Hose sehr langlebig macht. Gleichzeitig gewähren der bequeme Schnitt im Boyfriend-Stil und der Stretch durch die eingearbeiteten, hochelastischen T-400-Fasern viel Bewegungsfreiheit für harte Kletterzüge. Der schlanke Verschluss mit Slot-Button und das eingeprägte Logo auf der Gesäßtasche runden die Hose ab.

*Light, sporty, and highly functional climbing jeans with an innovative material mix. The Dyneema® content in the fabric makes the DY.EN.A PANTS up to 66% more tear resistant than comparable pants made from classic jeans fabric. The fabric is also particularly abrasion resistant, making the jeans extremely durable. At the same time, the comfortable boyfriend cut and the stretch enabled by the integrated, highly elastic T-400 fibers provide excellent freedom of movement for tricky climbing moves. The slender closure with a slot button and the embossed logo on the seat pocket round off the pants.*

- Innovativer Materialmix mit Dyneema®-Anteil für hohe Reiß- und Abriebfestigkeit
- Flacher Slot-Button-Verschluss trägt weniger auf
- Klassischer 5-Pocket-Schnitt
- Bund mit Gürtelschlaufen
- Innovative material mix with Dyneema® for excellent tear and abrasion resistance
- Flat slot button closure is less obtrusive
- Classic 5-pocket cut
- Waistband with belt loops

N°.	MATERIAL MATERIAL	GRÖSSE SIZE	FARBE COLOR
49246	Main Fabric: 84% Organic Cotton. 8% Lycra® T400, 6% Dyneema®, 2% Elastane	XS, S, M, L, XL	017 night

## 49275 ME DOLO JACKET

084 river

176 obsidian

Leichte Wärme, kleines Packmaß und ganz viel Bewegungsfreiheit zeichnen diese Daunenjacke aus. Die recycelten Daunen (700 cuin) stecken in einer speziellen Kammernkonstruktion, die zusammen mit dem stretchigen Obermaterial einen uneingeschränkten Bewegungsradius ermöglicht. Die ME DOLO JACKET liefert ein angenehmes Körperklima und Wärme und funktioniert als Außenjacke und Midlayer.

- Wasserabweisende DWR-Imprägnierung, C-0
- Helmkompatible, verstellbare Kapuze
- Zwei-Wege-Reißverschluss
- Brusttasche und zwei seitliche Eingriffstaschen mit Reißverschluss plus zwei große Innentaschen
- Logo-Transferdruck auf der Brusttasche und hinten auf der Schulter
- Kleines Packmaß, separater Packbeutel inklusive

*This down jacket offers light warmth, a small pack size, and outstanding freedom of movement. The recycled down (700 cuin) fills a special chamber construction that comes together with the stretchy upper to offer an unrestricted range of motion. The ME DOLO JACKET offers a pleasant body climate and warmth and can be worn as an outer jacket or a midlayer.*

- Water-repellent DWR impregnation, C-0
- Helmet-compatible, adjustable hood
- Two-way zipper
- Chest pocket and two zippered slash pockets on the sides plus two large inside pockets
- Logo transfer print on the chest pocket and the back of the shoulder
- Small pack size with separate stuff sack included

N°.	MATERIAL MATERIAL	GRÖSSE SIZE	FARBE COLOR

## 49253 ME ELDO JACKET

233 marigold

Leicht, schlicht und doch absolut funktionell, unsere Isolations-Jacke aus recycelter Daune (700 cuin fillpower). Das Obermaterial innen wie außen besteht aus recyceltem Nylon. Polyesterwattierung an den Armen und Schultern sorgt für eine optimale Feuchtigkeits- und Wärmeregulierung. Dank DWR-Behandlung und regulierbarer Kapuze wind- und wetterfest.

- Elastischer Bund an Kapuze, Ärmeln und Saum
- Logo-Transferdruck auf der Brusttasche
- Zwei-Wege-Reißverschluss vorne
- Brusttasche und zwei seitliche Eingriffstaschen mit Reißverschluss plus zwei große Innentaschen
- Klein packbar, separater Packbeutel inklusive

*Lightweight, simple, yet absolutely functional, our insulated jacket made of recycled down (700 cuin fill power). The upper on both the inside and outside is made from recycled nylon. Polyester padding on the arms and shoulders optimally regulates moisture and heat. The jacket is wind and weather-resistant thanks to its DWR treatment and adjustable hood.*

- Elasticated hood, cuffs and waistband
- Logo transfer print on the chest pocket
- Two-way front zipper

## 49272 ME PILASTRO PANTS

176 obsidian

186 blueberry

Diese vielseitige Regular-Fit-Softshellhose ist die richtige Wahl für alpine Unternehmungen und Mehrseillängen. Das 4-Wege-Stretchmaterial sorgt in Kombination mit dem Zwickel und den vorgeformten Kniepartien für richtig viel Bewegungsfreiheit und hohen Tragekomfort. Die Hose spendet leichte Wärme und weist mit ihrer umweltschonenden DWR-Behandlung Wasser ab. Der Klettergurt trägt sich bequem über den flachen Bund. Die Beinabschlüsse lassen sich individuell verstellen und wichtige Kleinigkeiten können sicher in den beiden vorderen Eingriffstaschen, der Gesäßtasche und der aufgesetzten Oberschenkeltasche verstaut werden.

- Softshell mit 4-Wege-Stretch
- DWR-Imprägnierung, C-0
- Flacher Bund mit Slot-Button und integriertem Gürtel mit Metallhakenverschluss
- 2 Eingriffstaschen, 1 Gesäßtasche und 1 Oberschenkeltasche rechts mit Reißverschluss
- Abnäher am Knie und eingearbeiteter Zwickel
- Verstellbarer Beinabschluss mit elastischer Kordel

*These versatile, regular-fit softshell pants are the perfect choice for alpine adventures and multi-pitch climbs. The four-way stretch material combined with the gusset and the pre-shaped knees offers outstanding freedom of movement and comfort. The pants provide light warmth and repel water with their environmentally friendly DWR coating. Climbing harnesses fit comfortably over the flat waistband. The ankle hems can be individually adjusted and important little items can be securely stored in the two front slash pockets, the seat pocket, and the patch thigh pocket.*

- Softshell with 4-way stretch
- DWR impregnation, C-0

## 49238 ME DY.EN.A PANTS

017 night

Sportliche, leichte und besonders funktionale Kletterjeans mit einem innovativen Materialmix. Der Dyneema®-Anteil im Stoff macht die DY.EN.A PANTS bis zu 66% reißfester als eine vergleichbare Hose mit klassischem Jeans-Stoff. Zudem ist der Stoff besonders abriebfest, was die Hose sehr langlebig macht. Gleichzeitig gewähren der bequeme Schnitt und der Stretch durch die eingearbeiteten, hochelastischen T-400-Fasern viel Bewegungsfreiheit für harte Kletterzüge. Der schlanke Verschluss mit Slot-Button und das eingeprägte Logo auf der Gesäßtasche runden die Hose ab.

- Innovativer Materialmix mit Dyneema®-Anteil für hohe Reiß- und Abriebfestigkeit
- Flacher Slot-Button-Verschluss trägt weniger auf
- Klassischer 5-Pocket-Schnitt
- Bund mit Gürtelschlaufen

*Light, sporty, and highly functional climbing jeans with an innovative material mix. The Dyneema® content in the fabric makes the DY.EN.A PANTS up to 66% more tear resistant than comparable pants made from classic jeans fabric. The fabric is also particularly abrasion resistant, making the jeans extremely durable. At the same time, the comfortable cut and the stretch enabled by the integrated, highly elastic T-400 fibers provide excellent freedom of movement for tricky climbing moves. The slender closure with a slot button and the embossed logo on the seat pocket round off the pants.*

- Innovative material mix with Dyneema® for excellent tear and abrasion resistance
- Flat slot button closure is less obtrusive
- Classic 5-pocket cut
- Waistband with belt loops

N°.	MATERIAL MATERIAL	GRÖSSE SIZE	FARBE COLOR
49238	Main Fabric: 84% Organic Cotton, 8% Lycra® T400, 6% Dyneema®, 2% Elastane	XS, S, M, L, XL	017 night

## ME PIAZ PANTS

076 desert

Eine stylische, abriebsfeste und langlebige Kletter- oder Boulderhose aus Canvas. Der Stretchanteil garantiert zusammen mit dem Zwickel und den vorgeformten Knien Tragekomfort und Bewegungsfreiheit, mit der auch der verrückteste Piazmove gelingt. Das schmalzulaufende Bein sorgt zusammen mit dem groben Baumwoll-Canvas-Material für einen modernen Look und macht die ME PIAZ PANTS zu einem Lieblingsteil für Fels oder Halle.

- Flacher Bund mit Slot-Button und integriertem Gürtel mit Metallhakenverschluss
- Abnäher am Knie und eingearbeiteter Zwickel für maximale Bewegungsfreiheit
- 2 Eingriffstaschen vorne und 2 Gesäßtaschen

*Stylish, abrasion-resistant, durable, canvas climbing or bouldering pants. The stretch content together with the gusset and pre-shaped knees provides comfort and freedom of movement even for the wildest lay-back moves. The tapered leg together with the tough blend of cotton and canvas creates a modern look that makes the ME PIAZ PANTS a favorite item for both crags and gyms.*

- Flat waistband with a slot button and integrated belt with a metal hook fastening
- Knee darts and integrated gusset for maximum freedom of movement
- 2 slash pockets at the front and 2 seat pockets

## MATERIALIEN / MATERIALS

Bei der Auswahl unserer Stoffe setzen wir auf nachhaltige Naturmaterialien, die fair produziert werden. In Kombination mit hochwertigen Funktionsmaterialien erreichen wir das Beste aus zwei Welten.

*In the selection of our fabrics, we rely on sustainable natural fabrics which are produced in a fair manner. In combination with high-quality functional materials, we achieve the best of two worlds.*

### Recycelte Daune

Dank fortgeschrittener Technologien können Daunen unter hohen Qualitätsstandards recycelt und dem Wertschöpfungsprozess wieder hinzugefügt werden. Mit unseren Produkten geben wir ihnen ein zweites Leben und schonen gleichzeitig unsere Ressourcen und unsere Umwelt. Damit steht die recycelte Daune für:

- ein natürliches Produkt mit hervorragenden Isolationseigenschaften bei minimalem Gewicht
- 100% nach Global Recycle Standard recycelte Daunen und Federchen gem. Auszeichnung
- die Reduzierung der Auswirkungen auf Natur und Tier auf ein Minimum

### FUZE Technologie

FUZE steht für eine permanente, chemiefreie Anti-Odor Ausrüstung. Silber und Gold Ionen verbinden sich in einem Wasserbad und bilden eine langlebige Schutzschicht um die Faser, die Geruchsbakterien effektiv stoppt. Durch die Kombination der beiden Edelmetalle ist die Faser nicht ionisiert und somit hautfreundlicher als viele andere Produkte auf dem Markt. Zudem erfolgt die Behandlung in einem geschlossenen Kreislauf und ist dadurch ressourcenschonend und umweltfreundlich. Somit steht FUZE für:

- zuverlässige Geruchsbekämpfung dank Silberionen
- waschbeständig durch Kombination mit Goldionen (mehr als 100 Waschgänge)
- nicht ionisch und somit hautfreundlich

### Recycled Down

*Thanks to advanced technologies, down can be recycled under high quality standards and added back to the value-added production process. Within our products, we give them a second life and at the same time protect our resources and our environment. As such, recycled down stands for:*

- a natural product with excellent insulating properties and minimal weight
- 100% recycled down and feathers certified by the Global Recycle Standard
- reducing the impact on nature and animals to a minimum

### FUZE technology

*FUZE stands for a permanent, chemical-free anti-odor finish. Silver and gold ions combine in a water bath to form a long-lasting protective layer around the fiber that effectively stops odor-causing bacteria. The combination of the two precious metals means that the fiber is not ionized, making it more skin-friendly than many other products on the market. In addition, the treatment takes place in a closed cycle and is therefore resource-saving and environmentally friendly. Thus, FUZE stands for:*

- reliable odor control thanks to silver ions
- wash-resistant due to combination with gold ions (more than 100 washes)
- non-ionic and therefore skin-friendly

Further information at: [www.fuzebiotech.com](http://www.fuzebiotech.com)

Weitere Informationen unter: [www.fuzebiotech.com](http://www.fuzebiotech.com)

### Recover®

Recover® ist eine besonders nachhaltige Textilfaser aus dem Hause Ferre. Das Besondere an dieser Faser ist, dass sie aus Altkleidern bzw. Textilabfällen hergestellt wird. Hierfür werden die Textilien zunächst zerkleinert, geschreddert und anschließend neu ausgesponnen. Farbvarianten werden durch die Kombination verschiedenfarbiger Ausgangsstoffe erreicht. Je nach Produkt wird Recover® mit anderen nachhaltigen Materialien (bspw. aus recycelten PET-Flaschen) kombiniert, um eine bestimmte Materialeigenschaft zu erzielen. Für Recover® spricht, dass:

- der Färbeprozess komplett entfällt, somit kein Wasser oder Chemikalien notwendig sind,
- bei der Produktion so gut wie keine Treibhausgase entstehen und
- der Upcycling-Prozess beliebig oft durchlaufen werden kann.

Weitere Informationen unter: [www.recovertext.com](http://www.recovertext.com).

### Organic Cotton

Konventionelle Baumwolle benötigt mehr Chemikalien pro Flächeneinheit als jede andere Pflanzenkultur und ist somit für über 15 % der Pestizide weltweit verantwortlich. Unserer Umwelt den größtmöglichen Respekt entgegenzubringen, scheint für uns als Hersteller von Outdoor-Ausrüstung selbstverständlich. Mit dem reinen Einsatz von Organic Cotton sind wir einen weiteren Schritt in Richtung nachhaltiger und umweltfreundlicher Outdoor-Ausrüstung gegangen. Ein Ja zu Organic Cotton ist gleichzeitig ein Ja zu:

- naturbelassenen, unbehandelten und Gentechnik freien Samen,
- gesunden Böden durch nachhaltige Feldwirtschaft,
- natürlicher Baumwolle aus kontrolliert biologischem Anbau und
- existenzsichernden Löhnen und fairen Arbeitsbedingungen.

*Cotton production uses more chemicals per unit area than any other crop and accounts in total for more than 15 % of the world's pesticides. Respecting our environment as much as possible, seems to us as a manufacturer of outdoor equipment self-evident. With the pure use of Organic Cotton, we have gone a step further towards sustainable and environmentally friendly outdoor equipment. A yes to Organic Cotton is also a yes for:*

- *natural, untreated GMO free seeds,*
- *healthy soil through crop rotation,*
- *natural cotton from controlled organic cultivation and*
- *decent living wages and fair working conditions.*

### Recover®

*Recover® is a particularly sustainable textile fiber from Ferre. What makes it special is that it is produced from second-hand clothes and textile waste. To do this, the textiles are cut up, shredded, then newly woven. A range of colors is achieved by combining different-colored starter fabrics. Depending on the product, Recover® is combined with other sustainable materials (e.g. from recycled PET bottles) to achieve specific material properties. The benefits of Recover® include:*

- *no dyeing process and therefore no need for water or chemicals,*
- *almost no greenhouse gases are generated during production,*
- *the upcycling process can be infinitely repeated.*

*For further information, please visit: [www.recovertext.com](http://www.recovertext.com).*

### Dyneema®

Ist der Markenname für eine textile Ultra-High-Molecular-Weight-Polyethylen-Faser (UHMWPE) von der Firma Koninklijke DSM N.V. Die Faser zeichnet sich durch ein herausragendes Festigkeits-Gewichtsverhältnis aus (Zugfestigkeit von 3400 N/mm<sup>2</sup> bei einer Dichte von nur 0,97 g/cm<sup>3</sup>). Bisher findet Dyneema® im Kletterbereich primär in Schlingen und Bändern Verwendung. Durch den Einsatz von Mischgeweben mit Dyneema® können wir Bekleidung mit einer deutlich höheren Reiß- und Abriebfestigkeit herstellen. Der Dyneema®-Jeansstoff unserer DY.EN.A PANTS ist bspw. viermal abriebfester als ein vergleichbarer normaler Jeansstoff. Diese Vorteile spielen sich im Klettersport besonders gut aus, da hier die Beanspruchung durch Kontakt mit scharfem Fels oder Seilreibung deutlich höher als im Alltag ist. Gleichzeitig macht der Dyneema®-Anteil das Gewebe insgesamt leichter.

*This is the brand name for a textile, ultra-high-molecular-weight polyethylene (UHMWPE) fiber from the company Koninklijke DSM N.V. The fiber is characterized by an outstanding strength-weight ratio (tensile strength of 3,400 N/mm<sup>2</sup> at a density of just 0.97 g/cm<sup>3</sup>). To date, the primary uses of Dyneema® in the field of climbing have been in slings and webbing. By using composite fabrics containing Dyneema®, we can make clothing that is far more tear and abrasion resistant. For example, the Dyneema® denim used for our DY.EN.A PANTS is four times more abrasion resistant than normal denim of comparable quality. These advantages are particularly beneficial in the field of climbing as clothing is subjected to far greater strain than in everyday life due to rope friction or contact with sharp rock. At the same time, the Dyneema® content reduces the fabric's overall weight.*

# RUBI

017 night

RUBI是一款轻量化，结实的背包，专门为多段结组和大岩壁攀爬设计。其轻量化，腰带和压缩织带不会阻碍在岩壁上的活动。轻松调节，可拆卸的织带提供了稳定的固定。RUBI有冰镐挂环和两个额外的连接环，一个用于提拉，一个用于其他装备。以及适合顶钩的织带用于运输背包。主仓非常容易拿取物品，外侧的小拉链袋能装重要的小物件。后部的内部仓有一个悬挂环，适合安装水袋，以及一个用于水袋管的弹性通道。这个内部仓也可以用于携带笔记本电脑，作为日常使用。

The RUBI is a light, robust backpack for multi-pitch routes and big wall climbing. Thanks to its low weight, hip belt, and compression straps, it never impairs freedom of movement on the wall. The easily adjustable, detachable chest strap furthermore provides a secure fit. The RUBI comes with an ice tool loop and two further attachment loops, one for hauling and one for gear, as well as webbing with a fifi hook for transporting a rope. The large main compartment is easy to access and important little items can be stored in the outer zip pocket. The internal compartment in the rear section with a hanging loop and a compartment for a hydration bladder as well as an elasticated channel for feeding the drinking tube through can also double up as a laptop compartment during everyday use.

- 结实，轻量化的攀岩背包，适合多段结组和大岩壁攀登
- 简单轻量化的腰带
- 可调节，拆卸的胸带
- 每侧有两个可调节和拆卸的压缩织带
- 配有冰镐环
- 配有装备环和提拉环
- 固定织带，用于在上方固定绳索
- 内仓可储存水袋，配有挂环，也可用于放置笔记本
- 内部的网眼拉链袋可存放重要的小物件

- Robust, light climbing backpack for multi-pitch routes and big wall climbing
- Simple, light hip belt
- Adjustable, detachable chest strap
- Two adjustable, detachable compression straps on each side
- Ice tool loop
- Gear and haul loops
- Compression webbing for attaching a rope to the lid
- Hanging loop and storage compartment for a hydration bladder or laptop
- Internal zippered mesh pocket for securely storing small valuables

# ROPE RIDER BAG 45

300 blue

时尚的大容量背包，有充足的空间装你的攀岩装备。

Stylish, large-capacity pack with plenty of space for all your climbing gear.

- 外侧有拉链袋，可以装胶带，钥匙，零钱等
- 内部多个口袋可以装手机、路书等
- 采用硬式的结构，背包在打开时依然能够直立
- 背负采用可调节肩带和可拆卸腰带
- 两侧的压缩织带可用于调节容量
- 内置有绳布

- Outer zip pocket for tape, keys, money, etc.
- Numerous inner pockets for cell phone, topos, guidebooks, etc.
- Due to its rigid construction, the pack retains its shape when standing open
- Carry system with adjustable shoulder straps and detachable waist belt
- Side compression straps for volume adjustment
- Rope tarp included

72186

## KURT HAULBAG 55

221 oasis-grey

非常耐用的拖拉包，有55L的容量适合长时间远征。创新的背包系统，可以完全拆除和收起来方便拖拉，即使KURT已经完全装满。不同长度的连接环在一侧方便拆卸。同时背负系统非常舒适，采用了人体工程学外形和衬垫，可以根据重物进行轻松调节。背板提供额外的舒适度，而且可以需要时拆除。前面的长拉链配有耐磨保护，能轻松拿取保内物品。超大的开口也能让KURT作为攀登公园和高空作业的装备包。

*Very robust haul bag with a 55 liter capacity for big adventures. The innovative rucksack system can be completely dismantled and stowed quickly and easily for hauling, even if the KURT is already fully packed. The differing lengths of shackle loops make unhooking on one side easy. At the same time, the rucksack system is comfortable thanks to its ergonomic shape and padding and can be easily adjusted to distribute a heavy load optimally. The back padding provides additional comfort when worn but can be removed if necessary. The long front zipper with special abrasion protection means the bag's contents are easily accessed. This extra-large opening makes the KURT also suitable as an equipment backpack for the climbing park or working at heights.*

- 采用耐磨结实的帆布制造
- 背负系统可以轻松拆除
- 两侧有压缩带
- 底部的四个环可以连接额外装备

- Made of robust tarpaulin
- Rucksack system easy and quick to remove
- Two side compression straps
- Four material loops on the base to attach additional equipment

货号N°.	重量 WEIGHT	体积 VOLUME	颜色 COLOR

## DIRT BAG

900 assorted colours

时尚环保，彩色的DIRT BAG采用我们生产时剩余的材料制造，非常适用于装小物品。

*Style combined with sustainability: the colorful DIRT BAG is made from remnants from our own production. Perfect for storing your valuables and small items.*

货号N°.	重量 WEIGHT	颜色 COLOR
72192	110 g	900 混合颜色

72183

## SETTER BAG

017 night

实用安全的定线包，用于岩馆装欧洲常用的杂物筐，可放置岩点和两个杂物筐。多用途的织带系统可以承受150kg的物品，可以以两个角度悬挂连接两个SETTER BAGS。内部空间630 x 420 x 300 mm。

*Practical and secure transport aid for route setters that perfectly holds the euro containers commonly used in most climbing gyms for storing holds or two type 2 mail containers. The all-round strap system withstands loads of up to 150 kg and can be suspended at two angles to allow the attachment of two SETTER BAGS. Internal dimensions: 630 x 420 x 300 mm.*

- 包括一个可以存放小部件（例如螺丝）的SETTER BOX
- 非常耐用，采用了有缺口的边角和加强边缘
- 织带可以固定物品
- 可以连接BEAKERS, FLASKS,或其他SETTER BAGS

- Includes a SETTER BOX for storing small parts such as screws
- Enhanced durability thanks to notched corners and reinforced edges
- Straps for securing the contents
- Side handles
- Features for attaching BEAKERS, FLASKS, or other SETTER BAGS

货号N°.	重量 WEIGHT	体积 VOLUME	颜色 COLOR
72183	986 g	40 l	017 暗黑色

## 72184 SETTER BOX

017 night

用于储存小零件和工具的实用小包。完美配合 SETTER BAG。

*Practical bag for storing small spare parts and tools. Perfectly matched for use in combination with the SETTER BAG.*

货号N°.	重量 WEIGHT	体积 VOLUME	颜色 COLOR
72184	241 g	3 l	017 暗黑色

## 72228 CADDY

773 deepblue

CADDY绳包系统不仅仅是一个储存攀岩绳的解决方案，它非常简单，经过精心设计，并且采用了循环利用的材料。

*The CADDY rope bag system is not just a practical solution for easily storing your climbing rope. The concept is incredibly simple yet well designed: production is very material efficient, as the CADDY is manufactured without any offcuts meaning we avoid production waste.*

- 可以容纳长达80m的绳索
- 4个连接点方便绳索管理
- 中间的地布能迅速储存绳索

- Sized to accommodate all ropes up to 80 m
- 4 tie-in points for better rope management
- Centered tarpaulin rope bag for quick rope storage

货号N°.	重量 WEIGHT	颜色 COLOR

72118

## TILLIT

105 light grey

结组路线上进行保护的创新绳包管理，高效使用，不需要绳结。TILLIT多功能绳包用于保护时存放绳索。仅仅翻转后就可以用另一端进行保护，让保护员进行先锋。绳包也可以连接到保护站上，让保护员更自由。

- 小体积，低重量
- 方便结组路线时的绳索管理，特别是在路线上转换先锋时
- 可以容纳两根60m半绳或对绳

A simple yet innovative solution for effective tangle and knot-free rope management when climbing and belaying multi-pitch routes. The TILLIT is a multifunctional rope bag that is attached to the belay and filled with rope as it is gathered in. By simply twisting the bag, the rope can be removed again from the opposite end, making handling far simpler when retaining the same lead climber. The weight of the rope is furthermore anchored to the belay station, offering the belayer more freedom of movement.

- Small pack size and low weight
- Optimizes rope handling when climbing multi-pitch routes, especially when retaining the same lead climber
- Capacity for two 60 m half or twin ropes

货号N°.	重量 WEIGHT	颜色 COLOR
72118	123 g	105 浅灰色
